European Union Aviation Safety Agency

FAQ n.104872

FAQs:

Cabin Safety, Supplemental Type Certificates

Question:

Covers replacement in 16g seats: is it required to perform certification tests to demonstrate compliance with 25.562?

Answer:

EASA is accepting the guidance of FAA AC-25.562-1b; dress covers do not require normally dynamic testing. Cushion changes would at least require 14g downward testing.
