European Union Aviation Safety Agency

FAQ n.116469

FAQs:

Other requirements, Provisions applicable to both ‘open’ and ’specific’ category, Drones (UAS), Regulations

Question:

Do I need insurance?

Answer:

You, as drone operator, are always required to have an insurance for your drone if you are using a drone with a weight above 20kg. However most of EASA Member States mandate a third party insurance also if you are operating a lighter drone. So please consult the national regulation.

Regulatory reference: Article 14 (2) (d) of EU regulation 2019/947.
