European Union Aviation Safety Agency

FAQ n.136916

FAQs:

ATM/ANS — Restrictive measures Russia, EU restrictive measures against Russia

Question:

Are aeronautical data services (DAT) providers located in the European Union permitted to continue to receive aeronautical information from Russian authoritative sources (e.g. Russian aeronautical information publication (AIP)), necessary to build their products?

Answer:

Receiving aeronautical information from an authoritative source in Russia is not impeded by the Sanctions Regulations, insofar as the aeronautical DAT provider does not engage in any transactions prohibited under Regulation (EU) No 833/2014 or make funds or economic resources available to persons/entities that are listed under EU sanctions, for instance in Regulation (EU) No 269/2014.
