Workshop — Implementation of the Aerodrome ‘Triple One’ Concept

Online event

Organised by: airsight GmbH and Brussels Airport Company

Event Type: Workshop

Date:
13 Dec 2023
13/12/2023, 10:00 - 13:00 CET (UTC +1)

Description

airsight GmbH invites all EASA stakeholder representatives in the Aerodromes (ADR) and Air Navigation Service Providers (ANSP) domain to an online webinar that dives into the latest developments and initial findings from the ongoing study on the ‘Triple One’ Concept. This event is hosted by airsight GmbH in cooperation with Brussels Airport Company, who were commissioned by EASA to conduct this study based on the analysis of recent occurrences, interviews, and workshops at aerodromes across Europe.

What is the ‘Triple One’ Concept?

Runway incursions represent one of the most severe incident types in aviation, carrying the potential for runway collisions with catastrophic consequences. As recommended by the International Civil Aviation Organization (ICAO) and the European Action Plan for the Prevention of Runway Incursions (EAPPRI), the adoption of a common communication frequency for runway operations significantly enhances the situational awareness of all stakeholders operating on a runway. Nevertheless, this approach relies on the use of a shared language, i.e. English, to ensure effective communication. By ensuring a comprehensive understanding of events occurring on and around the runway, this concept is intended as an additional safety layer within the aviation system.

Agenda

'Triple One' Concept Workshop Agenda

Registration

All stakeholders who directly participated in the study will receive a direct invitation to the event. If you have not received an invitation and you are interested in participating in the event, please contact TripleOne [at] airsight.de (TripleOne[at]airsight[dot]de)
