European Union Aviation Safety Agency

FAQ n.19422

FAQs:

EWIS ICA requirements

Question:

How can we as DOA identify if an aircraft model is applicable or otherwise has been made compliant (by means of a retroactive requirement) to this rule? Will it be entered into the TCDS or will there be an AD requiring that or does each individual DOA has to find its own way through it by going through the ICA documentation?

Answer:

The Agency is considering making public (possibly through the web site) the list of aeroplane types for which EWIS ICAs have been produced. The exact form has not yet been defined. Plan is also to have Special Condition formalised and referenced in the TCDS of the affected product.
