Presentations - 3rd Conference of the European Operators Flight Data Monitoring forum (EOFDM)

Description

The European Operators Flight Data Monitoring forum (EOFDM) is a voluntary partnership between European Aeroplane Operators and the European Aviation Safety Agency (EASA) in order:

- to facilitate the implementation of Flight Data Monitoring (FDM) programmes by operators, and
- to help operators in drawing the maximum safety benefits from an FDM programme.

The EOFDM works under the aegis of the European Commercial Aviation Safety Team (ECAST). For more information please consult the EOFDM webpage.

This third edition of the EOFDM Conference will contain technical presentations on the practical implementation of Flight Data Monitoring (FDM) programmes, advanced FDM techniques and lessons-learnt from accidents.

This conference is primarily dedicated for professionals involved with FDM. Presentations require at least basic knowledge of FDM to be followed.
