

# **EASA Industry Meeting**

## **Certification Activities**

## **Outsourcing Policy**

→ **Brussels, 26 April 2004**

# Main objective and mission

---

## → Our main objective

- ✧ To establish and maintain a high uniform level of civil aviation safety in Europe (for passengers, crews, and third parties)

## → Our mission

- ✧ Certification (airworthiness and environmental protection) of aeronautical products, design, production and maintenance organisations

# Milestones

---

- ➔ **15/07/2002: Agency's creation**  
(Regulation (EC) 1592/2002)
- ➔ **26/09/2003: Executive Director authorises NAAs to continue certification activities**
- ➔ **28/09/2003: Agency responsible for certification of aircraft, engines, parts and appliances** (Regulation (EC) 1702/2003 )
- ➔ **03/10/2003: Executive Director distributes tasks to NAAs**
- ➔ **28/11/2003: Agency responsible for continuing airworthiness** (Regulation (EC) 2042/2003)

# Legal and international context

---

- ➔ **EASA is built on a strong legal basis which provides certainty to stakeholders**
- ➔ **EASA is the European interlocutor in aviation safety**

# Work sharing context

---

- ➔ **Management Board has defined Agency guidelines for allocation of tasks to NAAs and qualified entities (with Commission approval)**
- ➔ **Arrangements with NAAs are covered by individual EASA/NAAs service contracts (signed or to be signed)**

# Our commitment to industry

---

✈ **To avoid or minimise any disruption to ongoing activities**

# How we work today

---

- ➔ **Certificates and approvals are signed by the Agency**
- ➔ **Certification experts are joining the Agency, and arrangements are developed to use external resources (NAAs) as necessary**

# How we work today

---

- ➔ **Temporary service contract with CJAA signed on December 2003**
- ➔ **Temporary outsourcing contracts are signed with LFV (Sweden), LBA (Germany)**
- ➔ **Temporary outsourcing contracts with other NAAs about to be signed**

# How we are going to work

---

## ➔ In the forthcoming months and years

- ✧ Certification Directorate takes over the tasks internally in parallel with its staff growth
  - The challenge: the necessary integration of NAA resources, and the definition of “in-house” working methods and procedures
  
- ✧ Contracts are phased out accordingly

# The need for outsourcing

---

- ➔ **NAAAs currently have most of the certification expertise**
- ➔ **However, EASA is legally responsible for certification tasks under Regulation 1592/2002**
- ➔ **And EASA needs time to build up its in-house technical expertise and procedures**
- ➔ **Therefore outsourcing contracts are the basis for a smooth transition of activities**

# Objectives of outsourcing

---

- ➔ **Ensure a smooth transition**
- ➔ **No negative impact on current or future certification activities**
- ➔ **Ensure uniform application of common rules**
- ➔ **Safeguarding of European certification expertise**

# Work sharing

---

## ➔ How do we share work in daily activities?

- ✧ Technical activities allocated by EASA to NAAs Responsible Parties as per the 3 October 2003 ED letter defining distribution of tasks to RPs
- ✧ Regular meetings with NAAs to ensure:
  - that activities are performed as per the Agency expectations, in a timely manner, and
  - to introduce flexibility as necessary in the allocation of tasks

# Mechanisms: NAA contracts

---

## → Contracts with NAAs (1)

- ✧ One standard contract model for all NAAs
- ✧ Defines how NAA services are to be provided
- ✧ Annexes define:
  - Lists of experts available for EASA certification and standardisation tasks
  - The products and organisations for which NAA executes certification tasks (including third countries) for EASA

# Mechanisms: standardisation

---

## → Contracts with NAAs (2)

- ✧ Until the Agency Quality and Standardisation Directorate is operational:
  - The Agency relies on those NAAs who have been subject of a JAA standardisation process (e.g. Primary Certification Authority)
  
- ✧ When the Agency Quality and Standardisation Directorate will be operational:
  - A standardisation activity and an “accreditation system” will be put gradually in place.

# Mechanisms: charging

---

## → Contracts with NAAs (3)

### ★ Charging systems:

- **Double charging to industry to be avoided at all costs**
- **National charging systems remain applicable until Commission Regulation on fees and charges is in force:**
  - No payment by EASA for NAAs' services for the time being
- **Financial arrangements to be incorporated into contracts later on**

# Conclusion

---

## ✧ **Today:**

- tasks allocated by EASA to NAAs RP
- Contracts in final process of development
- National charging systems still apply

## ✧ **Contracts signed:**

- With CJAA: 12/2003
- With Swedish and German NAAs: 03/2004
- Remaining NAAs: will be signed shortly

# Conclusion

---

## ✧ Tomorrow:

- Upon entry into force of EASA charging system contracts with NAAs will be amended accordingly
- A single EASA charging system will apply for those activities for which it is competent

--- END ---
