Cabin crew and cabin/passenger safety within EASA

Daniela Defossar

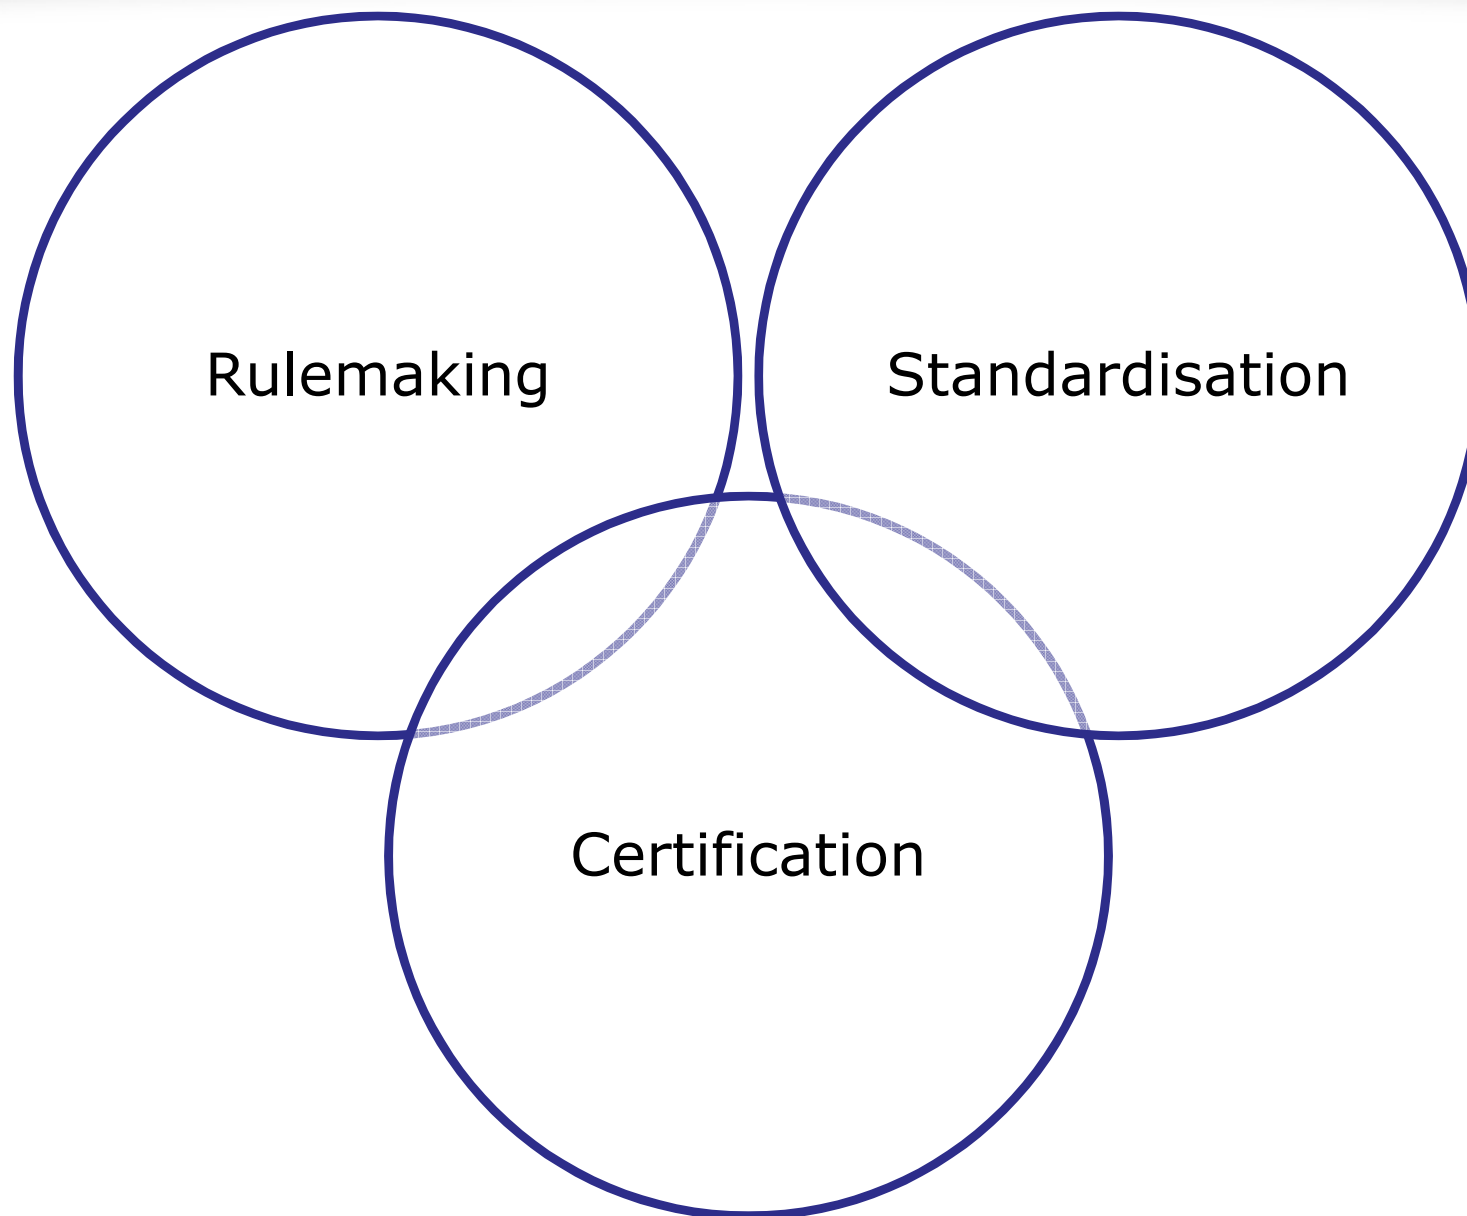

Manager Air Operations Rulemaking

22 October 2013

Your safety is our mission.
easa.europa.eu

EASA competencies

Rulemaking

- Developing requirements for initial, type-related and recurrent training and CS-CCD

Certification

- Establishing minimum cabin crew during certification
- approving OSD – type/variant for CC and related data for training

Standardisation

- Checking MS implementation of the rules

Cabin and passenger safety

Rulemaking

- Developing requirements for the design and installation of products and the operation of aircraft including cabin procedures

Certification

- Approving products and installations
- Approving type specific limitations

Standardisation

- Checking MS implementation of the rules

Working together

- EASA has set an Internal Coordination Group on CC/Cabin/Pax Safety to facilitate appropriate exchange of experience and coordination between R, C and S, with the objective to ensure consistency across the various relevant domains, associated rules and related Directorates/concerned colleagues
- EASA is dedicating efforts to contribute and assist the ICAO Cabin Safety Group
