

Authority Oversight, and Approval Journey

Key implementation steps

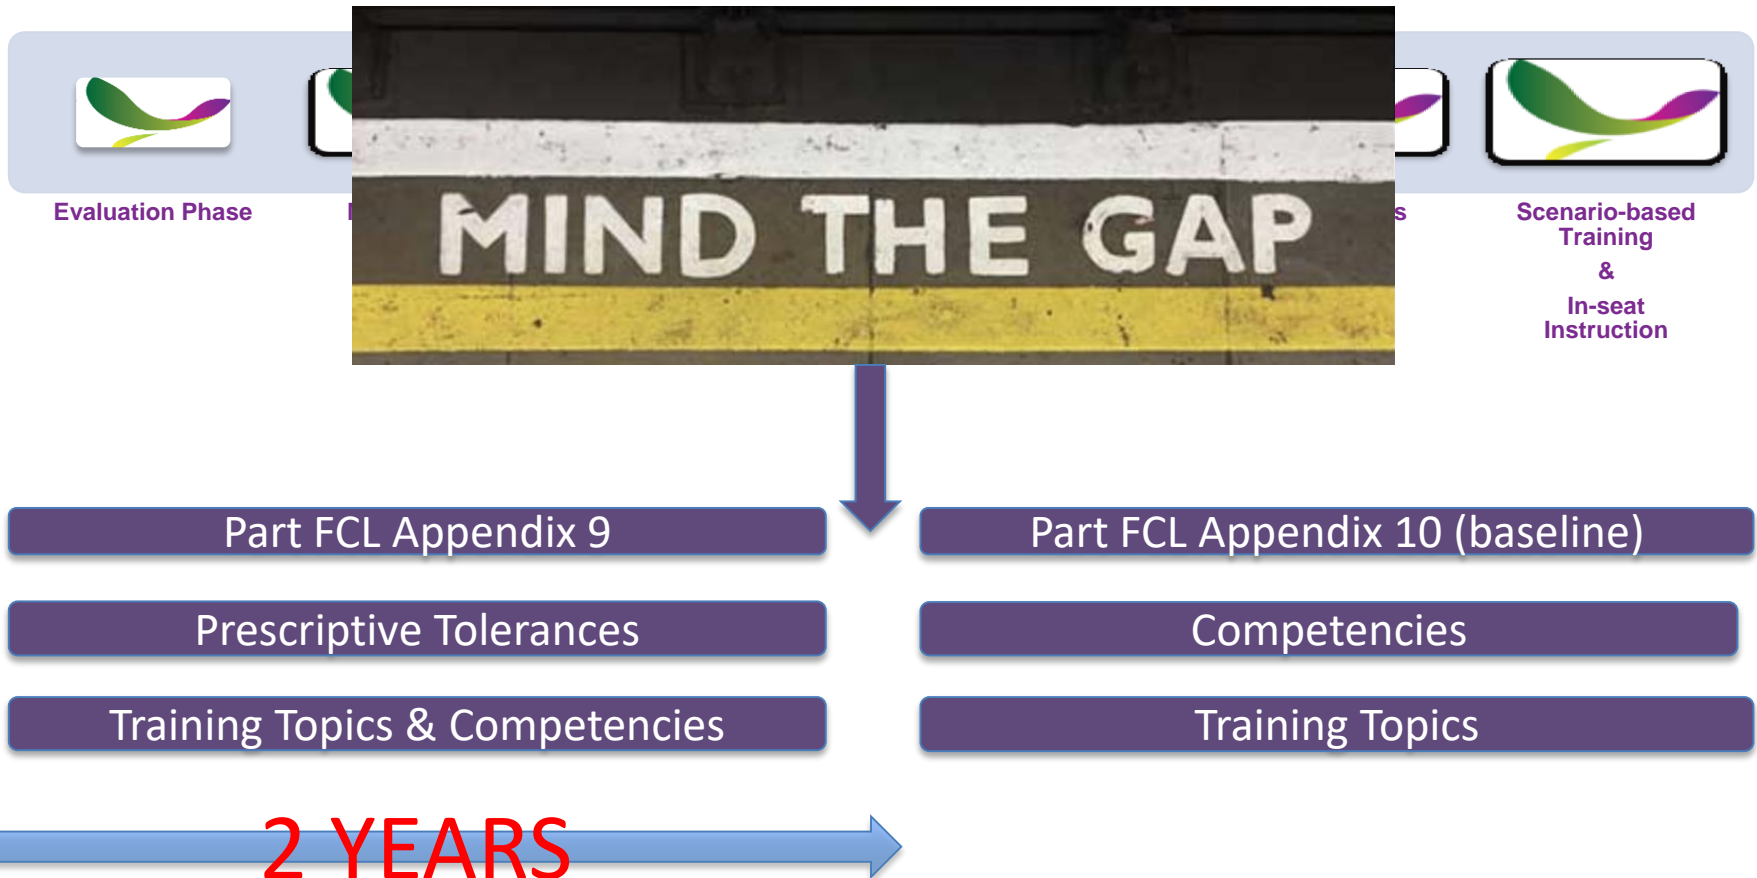

YOUR Journey to Baseline EBT

Regulatory under-pinning (EASA)

Mixed implementation EBT

'Full' EBT

Regulator (and industry) challenges

Golden rule 1:

CBTA over EBT - Understanding of what CBTA is and the journey to gain sufficient competency and structure to move towards EBT and subsequent approval

Regulator (and industry) challenges

**Trainer standardisation and skills,
demographic...**

**2 day EBTI course alone insufficient
for many....the foundation for an
operator must be the majority of
instructors and examiners already
competent assessing/developing
competencies, HF and root cause
analysis, good standard of grading and
report writing, etc.**

Regulator (and industry) challenges

**Organisational/demographic buy in of
CBTA philosophies and investment**

Regulator (and industry) challenges

Robust analysis of training needs, data and a truly pro-active and predictive system, collaborating with an integrated training system.

Safety department engagement and buy in, investment in technology and resourcing and development of internal subject matter expertise etc.

Sceptically challenge your data!

Regulator (and industry) challenges

**Integrated, innovative HF department,
an adult learning environment and
safe and 'just' culture**

Regulator (and industry) challenges

**Innovation and investment in training
design, devices etc**

Regulator (and industry) challenges

Control measures that prevent poor performance from reaching the line beyond a basic Appendix 9 LPC.

Whilst supporting and developing regulation, what we must do as a regulator is support industry within the current rule set to develop CBTA concepts, training design concepts, time management, instructor and examiner guidance etc.

We have done this in the UK clarifying compliance with standards guidance in standards document 24 V5 and will do so further going forwards.

We're here to help...
