## **MAIN DIFFICULTIES (1/2)**

- **Maintenance data :**
  - **Difficult to obtain + often in Russian language**
  - **Difficult to understand (e.g. SB 261-BE-G)**
  - **Not typical western style (e.g. YAK18T « 1993 maintenance schedule » : no calendar deadlines, huge preflight inspection)**

## **MAIN DIFFICULTIES (2/2)**

- **Spare parts :**
  - **Yakovlev/Russian production not recognised by EASA**
  - **Lack of maintenance organisations with appropriate ratings**
