Subject: Invitation Second EASA Rotorcraft Symposium

Dear Sir, dear Madam,

Following last year's successful first rotorcraft safety workshop, it is my pleasure to invite you to the second EASA Rotorcraft Symposium on 4-5 December in Cologne.

Maintaining and improving aviation safety is the highest priority for the Agency. In this spirit the symposium will focus on safety initiatives, technology updates and research projects helping to enhance rotorcraft safety. The Agency will furthermore present its draft Implementing Rules on Flight Crew Licensing and Operations with a focus on topics relevant for the rotorcraft community. Presentations by external organisations such as National Aviation Authorities, the European Helicopter Association, manufactures and operators are planned as well. Detailed information on the agenda of the symposium will be made available on the Agency's website at http://www.easa.europa.eu/ws_prod/g/g_events.php in due time.

It is our aim to continue the open and fruitful discussions with you from last year. I encourage the rotorcraft community to attend this two-day seminar and to progress its dialogue with the Agency.

Please forward your registration and any further questions to Elisabeth Schöffmann (e-Mail: elisabeth.schoffmann@easa.europa.eu, phone: +49 221 899902025).

Yours faithfully,

P. GOUDOU
