

Croatian Civil Aviation Agency

MAIN CHALLENGES WHEN OVERSEEING FRM AND FTL SCHEMES

Vili Vukšić

Head of Flight Operations and Training
Department
Croatian Civil Aviation Agency

5-2-2025

Preparation for the FRM/FTL oversight

- more time needed
- more data to be analysed
- competencies of the inspectors
- checking the prescriptive limits is easy, but assessing effective FRM...
- focus on SMS and FMT

Training of crew rostering personnel

- expectations from today's FTL rules are higher than ever
- knowing how to maintain prescriptive flight time limits is not enough

Training of crew rostering personnel

- adequacy of adapted ORO.FTL.250 FMT syllabi in reaching needed competencies
- appropriate application of FRM strategies
- understanding human factors and human performance limitation

Fatigue, FRM, FTL - a puzzle in the bigger picture

- adequate tuning of the risk-based oversight model
- mandatory occurrence reporting – fatigue as contributing factor

Fatigue, FRM, FTL - a puzzle in the bigger picture

- integration of all available fatigue data into relevant safety database (oversight, MOR/VORs, CDRs ...)
- feeding the SSP and achieving bidirectional strengthening – industry and authority
