

FAQs:

[Classification or notification of changes](#), [Air Traffic Management / Air Navigation Services \(ATM/ANS\) ground equipment](#), [Regulations](#)

Question:

The new regulation does not require a notification and documentation of a small change - in cases where the SoC is not changed. A different approach compared to today's DoVs, which cover the entire life cycle of a component/equipment - for small changes, a TF change is made. Will this create a problem at the end of the transition period? - TF will not be updated and SoCs will only have some changes

Answer:

The details for the notification and management (incl. documentation) of minor changes are illustrated at AMC/GM level.
