### Notes
- **STC Holder**: The company or individual responsible for the STC持有者
- **Description**: A brief description of the STC's purpose or function.
- **Certification basis**: The certification basis for the STC, including any applicable standards or guidelines.
- **Associated Technical Documentation**: Information about the associated technical documentation.
- **Limitations/Conditions**: Conditions or limitations associated with the STC.
- **Date of Issue**: The date the STC was issued.
- **Status**: The current status of the STC.
- **System Record**: The record number for the STC system.

### Notes
- The list includes STCs approved by EASA for various aircraft modifications and installations.
- Each STC is detailed with its associated certification basis, associated technical documentation, and limitations/conditions.
- The STCs are categorized by their type, including installation of weather radar, modifications to aircraft interiors, and other airworthiness requirements.
- The list also includes references to associated documents and modifications.

List of EASA Supplemental Type Certificates

easa.europa.eu

Airbus Corporate Jet Centre Modification CJ0540 Issue 4 - VIP Interior /QATARI Revision due to update of AFM-S and MPD-S

The Certification Basis for the original product as amended by the following additional or alternative airworthiness requirements as listed in the General ORI A-2301-007 "AGCJ Project Certification Basis". The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certification.

This STC is limited to A320-232 MSN 4170 Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

Installation of Northrop Grumman Dual Installation, Complete Custom Aircraft

The Certification Basis for the original product and the following additional or alternative airworthiness requirements are applicable to the installation of the associated certified noise level.

None

This STC is limited to A320-232 MSN 4170 Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

Installation of an International Aircraft Systems LITEF LCR-100 AHRS/FAASTC ST02025LA-D (issued March 10, 2010)

The Certification Basis for the original product and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certification.

Previous or concurrent requirement for this installation is approved installation of the LCR-93 AHRS in accordance with thestalj EDR 4487.

Installation in accordance with Scandinavian Avionics Design document FM-S968325 STC (STC Document List) Operation in accordance with Scandinavian Avionics Design document nF968325-AM (Aircraft Flight Manual Supplement) Instructions for Continued Airworthiness in accordance with ScandinavianAvionics...

Installation, Complete Custom Aircraft Interior - ASN 9379

EASA TCDS No IMA-0097 The Certification Basis for the original product remains applicable to the installation of the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certification.

Restricted to ASN 9379

**List of EASA Supplemental Type Certificates**

**Certification Basis**

The Certification Basis for the original product and the following additional or alternative airworthiness requirements are applicable to this certificate/ approval:

- Revision B of FAA STC ST0376CH (as amended by FAA on 24th June 2010) regarding installation of a Rockwell Collins HF-9000 HF Radio System in accordance with Armstrong Aerospace Master Data List, Doc. Number DC104-4033-00 Revision E, dated 27th May 2010, or later approved revisions.

**Limitations/Conditions**

- Approval limited to MSN4114 Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

**Date of Issue**

- 30/06/2010

**System Record**

- 10032001

**Status**

- Active

### List of EASA Supplemental Type Certificates

#### 10033488

**B/E AEROSPACE, INC.**

- STC Holder: B/E AEROSPACE
- Rev. 01/02/2012
- Model: 777-300, 777-300ER
- Description: Installation of B/E Aerospace Pantry Air Chiller P/N 470-1
- Certification basis: Certification basis
- Associated Technical Documentation: Master drawings
- Limitations/Conditions: Master drawings
- Date of Issue: 01/02/2011
- Status: Active
- System Description: TCCA STC

#### 10033490

**HELICOPTER AIR TRANSPORT GESELLSCHAFT & CO. KG**

- STC Holder: B/E AEROSPACE
- Rev. 03/07/2024
- Model: EC135 P1, EC135 P2, EC135 P3, EC135 P4
- Description: Replacement of Onboard Talon System with improved (OBS) stick AS 21-17 Rev. 1: Modification of double hook beam and release mechanism Rev. 2: Modification of the design of the Push-Pull Cablerelease System to optimize laverformance and flexibility Rev. 3: Adds wiring & Installations
- Certification basis: Certification basis
- Associated Technical Documentation: Master drawings
- Limitations/Conditions: Installation does not constitute operational approval Approval of PCDS (Personal Carrying Device System) for external load operation must be granted by the competent authority Prior to installation of this design change it must be determined that the interference between this design change and...

Installation of one twenty (22) gallon auxiliary fuel tank in each outboard wing panel in acc. with FAA STC SA1614WE.

The Certification Basis for the original product remains applicable. 

The requirements for environmental protection and the associated certified noise/ or emissions levels of the original product unaltered and remain applicable to this certificate/ approval.

The Installation and conditions of FAA Aircraft Specification A-799, FAA Data Sheets 3A12, 3A17, or FAA Data Sheets AEU and A19EU or EASA TCDSIM.A.051 apply, except as outlined below of this STC. 

Installation of NVIS Lighting System in

Installation of NVIS Lighting System in accordance with AIRplus. MOD. DO-365-33-101.

The Certification Basis for the original product remains applicable to this certificate/ approval. 

The requirements for environmental protection and the associated certified noise/ or emissions levels of the original product unaltered and remain applicable to this certificate/ approval.

Installation of one twelve (12) gallon associated certificated noise and/or emissions levels of the original product unaltered and remain applicable to this certificate/ approval.

Installation of a pylon mounted ejector panel in acc. with FAA STC ST01567LA.

The Certification Basis for the original product remains applicable to this certificate/ approval. 

The requirements for environmental protection and the associated certified noise/ or emissions levels of the original product unaltered and remain applicable to this certificate/ approval.

Installation of two 12 gal. auxiliary tanks in wing storage areas based on known previouslyinstalled modification and any other interrelationships between this modification it must be determined that there is no adverse effect upon the aircraft handling, aerodynamic efficiency and/or repair will introduce no adverse effect on the airworthiness of the original product. 

Installation: MOD. NVIS Lighting System document approved 101-01, Rev. 0 or later revisions of the above listed documents approved by EASA.

Installation of New J Class Crew Rest for Continental Airworthiness.

Design Change Statement do. N° DC-0194 Issue 1 dated 20.05.2011 or later revisions of the above listed documents approved by EASA.

Installation of New J Class Crew Rest for Continental Airworthiness.

Installation of New J Class Crew Rest for Continental Airworthiness.

Installation of New J Class Crew Rest for Continental Airworthiness.

**EASA STC No.**: EASA Supplemental Type Certificate Number.

**STC Holder**: The company or organization that holds the Supplemental Type Certificate.

**Rev. level**: Revision level of the Supplemental Type Certificate.

**Foreign/NAA STC ref.**: Reference to the foreign or national Supplemental Type Certificate.

**Models**: Models covered by the Supplemental Type Certificate.

**Certification basis**: The basis for the certification.

**Description**: A description of the modification or change.

**Certification basis**: The basis for the certification.

**Associated Technical Documentation**: The associated technical documentation.

**Limitations/Conditions**: Limitations and conditions associated with the modification or change.

**Date of Issue**: The date the Supplemental Type Certificate was issued.

**Status**: The status of the Supplemental Type Certificate (Active or Surnanded).

**System Record**: The system record number associated with the Supplemental Type Certificate.
