### Description

- **Certification basis**: The Certification Basis (CB) for the original product remains applicable to this certificate/ approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product remain unchanged and remain applicable to this certificate/ approval.

- **Limitations/Conditions**: Revisions to the Technical Implementation Procedures of EU/Canada/Bilateral Agreement Master Drawing Lists (a) LCA0030, Rev. 5; (b) LCA00317, Rev. 3; (c) LCA00331, Rev. 1, Type Specific Panel.

- **Date of Issue**: The Certification Basis (CB) for the original product remains applicable to this certificate/ approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product remain unchanged and remain applicable to this certificate/ approval.

- **Status**: It is the installer's responsibility to ensure that the STC is approved prior to installation. This design change must be determined by the interface between this design change and any other previously installed design change or repair. This STC is approved in accordance with the Amendment to the Technical Implementation Procedures of EU/Canada/Bilateral Agreement Master Drawing Lists (a) LCA0030, Rev. 5; (b) LCA00317, Rev. 3; (c) LCA00331, Rev. 1, Type Specific Panel.

### Notes

- **System Record**: 10043075, 10043079, 10043106, 10043115, 10043118, 10043123

**List of EASA Supplemental Type Certificates**

### 10045274

**STC Holder**: LUITTHANSA TECHNIX AG  
**STC No.**: A330-300  
**Description**: DUL A330 - Italian Style Interiors - Summary - Installation of new Y-Class, C-Class and First Class seats and lining.  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Associated Technical Documentation**: - Certification Plan CP5-12/116 Iss 1 at rev 2. Supplemental Type Design Definition Document STDDCS-12/116 Iss 1 rev 0 (Master document and definition). ICA, ref: A-00-1240-ICA, rev 01 - Compliance Record List CRLS-12/116 Iss 1 at rev 0 later revisions of the above listed documents approved by EASA.  
**Limitations/conditions**: Prior to installation of this modification it must be determined that the interrelationship between this modification and any other previously installed modification and/or repair will introduce no adverse effect upon the airworthiness of the product.  
**Date of Issue**: 12/06/2013  
**Status**: Active  
**System Record**: 10104274

### 10045275

**STC Holder**: SUPERJET INTERNATIONAL S.P.A.  
**STC No.**: RRU-95B  
**Description**: SSJ-100 - Italian style Interiors - Installation Original STC is installing Italian Style interiors in SUHO1 RRU-95S (Aircraft). Change Notice CN-UJ93-0022 introduces Lavatories reinforcement and removes the AFM Limitations. Change Notice CN-UJ93-0025 introduces structural reinforcement on gallery22 to improve flight deck safety.  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Limitations/conditions**: Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.  
**Date of Issue**: 08/03/2017  
**Status**: Active  
**System Record**: 10045275

### 10045282

**STC Holder**: DUNLOP AIRCRAFT TYRES LIMITED  
**STC No.**: CAA UK RESPONSIBILITY ATR 72-211/-212/-212A ATR 72-101/102-201-202  
**Description**: Installation of Dunlop Aircraft Tyres on ATR 72-212 model. The STC installs Dunlop Aircraft Tyres Ltd PN D220730T (Main LandingGear) and PN DR155007 (Nose Landing Gear).  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Associated Technical Documentation**: Master Document List, ref. DALT_Pr MDL Rev IR, dated 20 May 2013 Instruction for Continued Airworthiness, ref. DALT_PRICHA Rev IR, dated 20 May 2013 or later revisions of the above listed documents approved by EASA.  
**Limitations/conditions**: None.  
**Date of Issue**: 12/06/2013  
**Status**: Active  
**System Record**: 10045282

### 10045283

**STC Holder**: CHALLENGER AVIATION PRODUCTS INC.  
**STC No.**: FAA STC SEAL2352CH SEE EASA APPROVED MODEL LIST  
**Description**: Direct Oil Filter Replacement - EASA Validation of FAA STC SEAL2352CH (Installation of Challenger LeakFree oil filter assembly in accordance with Challenger Aviation Products, Inc. Installation Instructions 1124 Revision B, dated October 31, 2009, or later FAA approved revision).  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Associated Technical Documentation**: Challenger Aviation Products, Inc. Installation Instructions 1124 revision B, dated October 31, 2009 or later revisions of the above listed documents approved by EASA.  
**Limitations/conditions**: 1. Compatibility of this design change with previous modifications must be determined by the installer. 2. Use of Challenger Aviation Products, Inc. Inspection and Cleaning Instructions 1125, Revision C, dated October 31, 2009 or later FAA approved revisions is required. 3. A copy of this certificate must be affixed to the aircraft.  
**Date of Issue**: 12/06/2013  
**Status**: Active  
**System Record**: 10045283

### 10045284

**STC Holder**: TATENHILL AVIATION LTD.  
**STC No.**: CAAC UK RESPONSIBILITY PA-31  
**Description**: Approval of an Aspen EFD-1000 Primary Flight Displays against the requirements of EU-OPS for Dual Pilot Operations.  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Associated Technical Documentation**: Master Document List/MDL. 00812 Revision B Installation Manual/ATM. 00812 Revision A Installation Instructions for Continued Airworthiness ICA. 00812 Revision AFFIG FT Document Supplement/OPS. 00812 Revision Ari later revisions of the above listed documents approved by EASA.  
**Limitations/conditions**: None.  
**Date of Issue**: 12/06/2013  
**Status**: Active  
**System Record**: 10045284

### 10045290

**STC Holder**: UUDS  
**STC No.**: A330-200  
**Description**: Contour A330-200 Business Class seat modification and bumper installation. This modification removes the existing RockwellCollins IFE equipment monitors and harnesses from Contour Business class double seats Model/200300-001 and replaces existing Amsafe seat belts. The seats are modified to provide...  
**Certification Basis**: For the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated/modified noise and/or emissions levels of the original product unachieved and remain applicable to this certificate/approval.  
**Associated Technical Documentation**: Master Modification Sheet MM- TMS99-065-25-001-00r later revisions of the above listed documents approved by EASA.  
**Limitations/conditions**: Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.  
**Date of Issue**: 13/06/2013  
**Status**: Active

**List of EASA Supplemental Type Certificates**

- **10046919**
  - STC Holder: ANVI, Inc.
  - Rev: REV. 2
  - Description: Installation of an ANVI Inc. Exceedance and Trend Monitoring System to PMN ETM1000. Purpose of the STC revision 01 is the application of Exceedance and Trend Monitoring System to Bell 204B and Bell 206A-1. Purpose of this STC revision 02 is the application of Exceedance and Trend Monitoring System.
  - Certification Basis: The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated capability noise/and or emissions levels of the original product remain unchanged and remain applicable to this certificate/approval.
  - Limitations/Conditions: The Exceedance and Trend Monitoring System can only be installed on any FVFR aircraft with non-FADEC equipped engine (unless a specific Modified FADEC rotorcraft is noted in the AM). It is for ground crew interoperability maintenance functions and not intended to replace the original indicator as certified.

- **10046964**
  - STC Holder: WACO CLASSIC AIRCRAFT CORPORATION
  - Rev: REV. 1
  - Description: Modify the WACO YMF to a Classic "WACO FS" or "WACO F5C" configuration according to Classic Drawing Number CAC-FS.
  - Certification Basis: The Certification Basis (CB) for the original product remains applicable to this certificate/approval. This certificate/approval involves a change to the requirements for environmental protection or a change to the certified noise or emissions levels.

- **10046966**
  - STC Holder: JET AVIATION AG
  - Rev: REV. 3
  - Description: Passenger Gasous Oxygen System Rev. 2. Transfer STC 10046965. Rev. 3: Modification of the oxygen system due to part obsolescence and service support from part OEM. The modification comprises of alternative pulse latching valves, removal of oxygen regulators and limitators.
  - Certification Basis: The Type and OSD Certification Bases for the original product as amended by the following additional or alternative airworthiness requirements: The following paragraph(s) at a later amendment of C5.869 Amdt. 06, CS 19.1301 Amdt. 02, CS 25.1300 Amdt. 06, CS 25.1411 Initial Issue, CS 25.1453 Amdt. 04.

- **10046967**
  - STC Holder: DELTA ENGINEERING CORPORATION
  - Rev: REV. 1
  - Description: Panasonic Global Communications Subinstallation of a Panasonic Global Communications Suite Ku-Band Antenna.
  - Certification Basis: The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated capability noise/ or emissions levels of the original product remain unchanged and remain applicable to this certificate/approval.

- **10046968**
  - STC Holder: DELTA ENGINEERING CORPORATION
  - Rev: REV. 2
  - Description: Panasonic Global Communications Subinstallation of a Panasonic Global Communications Suite which provides passengers with in-flight Wi-Fi, cellular phone and TV.
  - Certification Basis: The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated capability noise/ or emissions levels of the original product remain unchanged and remain applicable to this certificate/approval.

- **10046969**
  - STC Holder: JET AVIATION AG
  - Rev: REV. 3
  - Description: Passenger Gasous Oxygen System Rev. 2. Transfer STC 10046965. Rev. 3: Modification of the oxygen system due to part obsolescence and service support from part OEM. The modification comprises of alternative pulse latching valves, removal of oxygen regulators and limitators.
  - Certification Basis: The Type and OSD Certification Bases for the original product as amended by the following additional or alternative airworthiness requirements: The following paragraph(s) at a later amendment of C5.869 Amdt. 06, CS 19.1301 Amdt. 02, CS 25.1300 Amdt. 06, CS 25.1411 Initial Issue, CS 25.1453 Amdt. 04.

P.68 OBSERVER 2 P.68C, P.68C-TC
P.68 Mission cabin configuration with Option for Flight into Known icing for P.68R "VICTOR" STC-AT-071(1) certifies the Mission cabin configuration, prequalified the general installation into the P.68. The STC-AT-071(1) consists of the following steps which can be performed as required: Step 1: "Mission cabin configuration, P.68 Mission cabin configuration with "OBSERVER" 737-800 LUFTHANSA"
"Collectors" VIP Cabin Completion Rev. 1: Update of referenced ICA documentation.
Change/Repair Approval, Doc. No. STC-071C-G-AS, Rev. Installation Instructions, Doc. No. 071-II-STC-AT, Rev. 1, dated 02/03/2015 (related to Step 1) to Installation Instructions, Doc. No. STC-071C-G-AS, Rev. 0, dated 08/09/2019 (related only to Step R1) for Step 1 of STC-AT-071-AM Supplement, Doc. No...
The Installation of this STC-AT-071(1) is only allowed in aircraft where Letter of Authorization "STC-071(1)-G-LOA" has been issued by AirbornTechnologies GmbH. Prerequisites for each individual step of this STC are defined in section 1.1 of the installation instructions. Doc. No. 071-d-STC-AT.

HAI CO CABIN SOLUTIONS, LLC
FAA STC ST04170AT
A320-214
Installation and activation of an EFE System
The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

- Instructions for Continued Airworthiness, TIMCO document No. 13T310L009(3)(c) Revision A, dated 11 December 2014 or later revisions of the above listed documents approved by EASA.
- Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

10052548
MARSHALL AVIATION SERVICES LIMITED
CAA UK RESPONSIBILITY
B200CGT, B300C, B200, B200C, B200GT
Introduction of Rockwell Collins TCAS-4000 (TTR-4000) with Version 7.1 software as an update to an existing TCAS-4000 with Change 7.0 software in accordance with Marshall Aerospace Services Ltd Modification NoSC0530A.
The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

- Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

10052551
AVIATION COMMUNICATION ANDREWELLAN CE SYSTEMS, L.L.C. (ACSS)
FAA ST0254LA SEE APPROVED MODEL LIST
Upgrade of ACSS ACAS II Version 7.0 to incorporate EASA AD 2012-02 (various aircraft models are included)
The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

- EASA AML List or later revisions of the above listed documents approved by EASA in accordance with EASA ED Decision 2004/004/CF or subsequent revisions of this decision and/or the Technical Implementation Procedures of EU USA Bilateral Agreement.
- Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

**Notes:**
- The STC holder is the primary entity responsible for the installation and maintenance of the STC.
- Rev. level refers to the revision level of the STC.
- Foreign/NAA STC ref. indicates any additional STCs or approvals from other authorities.
- Model Numbers include relevant model specifications.
- Description outlines key aspects of the STC installation.
- Certification basis details the regulatory requirements.
- Associated Technical Documentation, Limitations/Conditions, Date of Issue, Status, and System Record provide additional context for approval and implementation.

**EASA.europa.eu:**
- A website for European aviation regulations and certifications.

List of EASA Supplemental Type Certificates

described in the Certification Plan, Doc. No. CP-0201-2500, Rev. C, dated 06.07.2015.

The Certification Basis (CB) for the original product as amended by the following paragraph(s) at a later amendment:
- CS 25 amdt 4 - CS 25.1, CS 25.1301, CS 25.1309, CS 25.1501, CS 25.1529, CS 25.1581. The requirements for
environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/ approval.

Approval valid only for MSN 37560 - The installation of the A-00-12/49-ICA section 4 - The airplane shall be operated
- supplementary to Installation and Approval of the above listed documents approved by EASA. 
- The Certification Basis for the original product as amended by the following paragraph(s) at a later amendment:
- CS 25.1301, CS 25.1309, CS 25.1501, CS 25.1529, CS 25.1581. The requirements for
environmental protection and the associated certified noise and/or emissions levels of the original product.

EASA STC 10041604 (EASA Project Number 0010008975-001) is applicable to this certificate/ approval. Prior to installation of this change/ repair it must be determined that the interrelationship between this change/repair and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product.

Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product. 

Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product. 

Airbus A300-203(‑1, +1) TCAS Change 7.1 Upgrade

The Certification Basis for the original product as amended by the following additional or alternative airworthiness requirements:

Applelicable to aircraft serial number 255 only. Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product.

Applicable to aircraft serial number 255 only. Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product.

Applicable to aircraft serial number 255 only. Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce radiative effect upon the airworthiness of the product.

Installation of IFE server Rev. 1: Modification of system operational limitation. The Certification Basis for the original product remains applicable to this certificate/ approval. The requirements for environmental protection and the associated certification limitations are replaced by inspections. The requirements for structural soundness with respect to corrosion were addressed by inspection cycles. The lifetime limitation addressed by inspections is replaced by intervals. The LED modules which require less power are available. These lights are for general illumination and provide no emergency lighting. Prior to installation of this design change it must be determined that the interrelationship between the design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

Installation of a Bruce Aerospace Cabin Lighting System. The STC installs new LED lighting systems which require less power. The lights are for general illumination and provide no emergency lighting. They require power and interface with a new control panel to allow operation. Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

Replacement of the lifetime limitation of 35 calendar years by periodic inspections. Structural soundness with respect to corrosion was addressed by tightening of 35 years. The limitation is replaced by inspections outlined in SB IS-28B2/E0-26 at short intervals. The lifetime limitation addressed by inspections is replaced by intervals. The requirements for structural soundness with respect to corrosion were addressed by inspection cycles. The requirements for environmental protection and the associated certification limitations are replaced by inspections. The Certification Basis for the original product remains applicable to this certificate/ approval. The requirements for environmental protection and the associated certification limitations are replaced by inspections. Aircraft Flight and Maintenance Manual issue 2A, replacement of pages 2.2.D, 2.3.C, and 23.2.D at revision 17, dated May 2015, Aircraft Flight and Maintenance Manual issue 3, replacement of pages 2.4.C, 3.2.1.C, and 6.10.F at revision 41, dated May 2015. Prior to installation of this design change it must be determined that the interrelationship between this design change and any other previously installed design change and/or repair will introduce no adverse effect upon the airworthiness of the product.

The Certification Basis for the original product as amended by the following additional or alternative airworthiness requirements: Appendix 1. Certification Basis (1) The type certification basis for Model 412EP helicopter as shown in EASA, IM: R-108 remains valid for 412EP parts not impacted by this change...

1) This STC is limited to 412EP aircraft serial number 36248 and subsequent or those otherwise modified to be equivalent with regards to AHRS (LIR-100) wiring and installation. For aircraft serial numbers 36248 through 36490, the dual LCR-92 AHRS installation must be replaced with the dual LCR-100.

10057662  EMBRAER GPX Ltda (PC 725) ANAC BRAZIL REF 2013S09-09 EMB-505 Installation of Pilot’s new extended seat tracks.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce a adverse effect upon the airworthiness of the product.

10057665  DAVIS AVIATION SERVICES FAA STC SA2830SO U206, U206A THROUGH G 206, P206, P206A THROUGH E Installation of a Telakomye Continental Motors (TOM) model IO-550-E5B50B engine, with either a McCauley model D3A34C200G0FA10-D1, D3A34C4011G0DF0A10, D3A34C4011G0DF0A10, or a Harriell model HC-23YV-1RF, FL87C13H9, PHC-23YV-1RF, FA-8468A1-9R, PHC-23YF-1RF, FA-8468A8-9R, PHC-23YF-1RF.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce a adverse effect upon the airworthiness of the product.

10057671  HARTZELL PROPELLER INC. REV. 1 FAA STC SR03474CH Installation of Heli-Preheat Kit, p/n TA3083-1 for 115 volt preheating installation of Heli-Preheat Kit, p/n TA3083-2 for 230 volt application.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce a adverse effect upon the airworthiness of the product.

10057674  HARTZELL PROPELLER LLC REV. 1 FAA STC SR03168CH Installation of Heli-Preheat Kit, p/n TA5854-1 for 115 volt preheating installation of Heli-Preheat Kit, p/n TA5854-2 for 230 volt application.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce a adverse effect upon the airworthiness of the product.

10057681  EMBRAER GXP Ltda (PC 725) ANAC BRAZIL REF 2013S09-09 EMB-505 Installation of Pilot’s new extended seat tracks.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce an adverse effect upon the airworthiness of the product.

10057682  EMBRAER GXP Ltda (PC 725) ANAC BRAZIL REF 2013S09-09 EMB-505 Installation of Pilot’s new extended seat tracks.

The Certification Basis (CB) for the original product remains applicable to this certificate/approval. The requirements for environmental protection and the associated certified noise and/or emissions levels of the original product are unchanged and remain applicable to this certificate/approval.

Prior to installation of this change, it must be determined whether the interrelationship between this design change and any other previously installed design change and/or repair will introduce an adverse effect upon the airworthiness of the product.

**Notes:****
- **STC Holder**: The company or entity that holds the Supplemental Type Certificate.
- **STC Date/No.**: The date and number of the Supplemental Type Certificate.
- **Certification Basis**: The basis for the certification, which may include reference to applicable regulations or standards.
- **Associated Technical Documentation**: Documentation related to the certification basis.
- **Limitations/Conditions**: Any limitations or conditions associated with the certification.
- **Date of Issue**: The date the Supplemental Type Certificate was issued.
- **Status**: The current status of the Supplemental Type Certificate, such as Active.
- **System Record**: A unique identifier for the Supplemental Type Certificate.

**EASA** is the European Union’s Agency for Safety in Aviation. For more information, visit easa.europa.eu.
