TYPE-CERTIFICATE
DATA SHEET

No. EASA.A.151

AIRBUS A350

Type Certificate Holder:

AIRBUS S.A.S.

2 Rond-point Emile Dewoitine
31700 BLAIGNAC
FRANCE

Airworthiness Category: Large Aeroplanes

For Model(s): A350-941
A350-1041
## Table of Contents

**SECTION 1: A350-900 SERIES**

I. **GENERAL**
1. Type/Model 4
2. Performance Class 4
3. Certifying Authority 4
4. Manufacturer 4
5. EASA Certification Application Date 4
6. EASA Type Certification Date 4
II. **CERTIFICATION BASIS**
1. EASA Certification Basis 5
2. Special Conditions 5
3. Exemptions / Deviations 6
4. Equivalent safety findings (21A.21(c)(2)) 7
5. Environmental requirements 7
6. Operational Suitability Data 8
III. **TECHNICAL CHARACTERISTICS AND OPERATIONAL LIMITATIONS**
1. A350-900 powered by RR engines 9
2. Data pertinent to all A350-900 series 11
IV. **OPERATING AND SERVICE INSTRUCTIONS**
1. Aircraft Flight Manual 15
2. Maintenance Instructions and Airworthiness Limitations 15
3. ETOPS 15
V. **OPERATIONAL SUITABILITY DATA (OSD)**
1. Master Minimum Equipment List 16
2. Flight Crew Data 16
3. Cabin Crew Data 16

**SECTION 2: A350-1000 SERIES**

I. **GENERAL**
1. Type/Model 17
2. Performance Class 17
3. Certifying Authority 17
4. Manufacturer 17
5. EASA Certification Application Date 17
6. EASA Type Certification Date 17
II. **CERTIFICATION BASIS**
1. EASA Certification Basis 18
2. Special Conditions 18
3. Exemptions / Deviations 19
4. Equivalent safety findings (21A.21(c)(2)) 19
5. Environmental requirements 20
6. Reversions 20
7. Operational Suitability Data 21
III. TECHNICAL CHARACTERISTICS AND OPERATIONAL LIMITATIONS

1. A350-1000 powered by RR engines
2. Data pertinent to all A350-1000 series

IV. OPERATING AND SERVICE INSTRUCTIONS

1. Aircraft Flight Manual
2. Maintenance Instructions and Airworthiness Limitations
3. ETOPS

V. OPERATIONAL SUITABILITY DATA (OSD)

1. Master Minimum Equipment List
2. Flight Crew Data
3. Cabin Crew Data

ADMINISTRATIVE SECTION

VI. ACRONYMS AND ABBREVIATIONS

VII. CHANGE RECORD
SECTION 1: A350-900 SERIES

I. GENERAL

1. Type/Model
   A350-941

2. Performance Class
   A

3. Certifying Authority
   EASA

4. Manufacturer
   AIRBUS
   2 Rond-point Emile Dewoitine
   31700 Blagnac
   FRANCE

5. EASA Certification Application Date
   A350-941: 15 November 2009

6. EASA Type Certification Date
   A350-941: 30 September 2014
II. CERTIFICATION BASIS

1. EASA Certification Basis

The following EASA airworthiness standards are:

- EASA Certification Specification 25.851 (a) and (c) at Amendment 17 for the installation of halon free handheld fire extinguisher.
- EASA Certification Specifications AWO, Initial Issue – All Weather Operations.

- For type A+ emergency exit installation (see also ESF D-39), the following CS are applicable at amendment 20:

  For mixed configurations involving Type A, C and A+ emergency exits, except CS 25.795(d) and 25.803(a)(c), the applicable CS may continue to be applied at an amendment that was applicable before the installation of type A+ emergency exits if the area is not affected by the type + installation.

- For modification 114946 installation or changes to the cowling or nacelle skin:
  CS 25.1193(e)(4)(f) amendment 22

2. Special Conditions

   SC B-01    Stalling and Scheduled Operating Speeds
   SC B-02    Motion and effect of cockpit controls
   SC B-04    Static Directional, Lateral and Longitudinal Stability and Low Energy Awareness
   SC B-05    Flight envelope protection
   SC B-06    Normal Load Factor limiting System
   SC B-09    Flight in Icing Condition
   SC B-11    Soft Go Around Mode (post-TC)
   SC B-15    Shorter Landing Distances on eligible Wet Grooved or PFC runways

5. Environmental Protection Requirements

Fuel venting:
Certification Specification-34 initial issue
ICAO Annex 16, Volume II, amendment 06, Part II, chapter II

Noise:
See TCDSN No. EASA.A.151
6. Operational Suitability Data

The EASA Type Certification with respect to Operational Suitability Data (OSD) is defined as follows:

MMEL: Certification Specifications for Master Minimum Equipment List CS-MMEL Initial Issue dated 31 January 2014 (Book 1 only)

III. TECHNICAL CHARACTERISTICS AND OPERATIONAL LIMITATIONS

1. A350-900 powered by RR engines

1.1 Type Design Definition

A350-941 Type Design Definition: 00 V 000 A0941 / C90 Issue 2 or later approved issues

1.2 Engines

A350-941: Two (2) Rolls Royce Trent XWB-84 or XWB-75 (modification 113768) turbofan engines
See Engine Type Certificate Data Sheet EASA E.111
Engine limitations: See Engine TCDS EASA.E.111.

1.3 Fuel and fuel additives

The fuel system has been certified with: JET A, JET A1, JP5, JP8, N° 3 Jet Fuel, RT and TS-1.

Refer to applicable Airbus Consumable Material List (CML) for additives.

1.4 Oil

Refer to applicable Airbus Consumable Material List (CML).

1.5 Limit Speeds

Refer to approved Airplane Flight Manual.

1.6 Centre of Gravity Range

Refer to approved Airplane Flight Manual.
### 1.7 Maximum Certified Weights

</tr>
</tbody>
</table>

Fuel density is 0.785 kg/l

2.3 **Minimum Flight Crew**

Two (2): Pilot and Co-pilot

2.4 **Minimum Cabin Crew**

For the A350-900, the minimum required cabin crew number established during the aircraft certification process is 8 (2 per exit pair), irrespective of the Maximum Operational Passenger Seating Capacity (MOPSC).

The above minimum cabin crew numbers are those demonstrated by the type certificate holder. A lower number is acceptable in the case of specific cabin layouts if documented in an EASA approved major design change or Supplemental Type Certificate (STC).

In accordance with the operational requirement ORO.CC.100-Number and composition of cabin crew, if the MOPSC for the specific aircraft exceeds 400, the minimum required cabin crew number becomes 9.

If, for the installation of Type A+ emergency exits, the modifications referenced in Section 1, part III, paragraph 2.5 are embodied, in addition a third cabin crew member must be stationed at each installed pair of Type A+ emergency exits.

2.5 **Maximum Operational Passenger Seating Capacity**

The maximum number of passengers approved for emergency evacuation are:

![Diagram of passenger seating arrangement]
If, for the installation of Type A+ emergency exits, the following modifications are embodied:

- Mod 115016 and 110972 and as applicable
- Mod 110654 (Type A+ dual lane slide-rafts at PAX doors 1 LH/RH) and/or
- Mod 110655 (Type A+ dual lane slide-rafts at PAX doors 2 LH/RH) and/or
- Mod 114823 (Type A+ dual lane slide-rafts at PAX doors 3 LH/RH) and/or
- Mod 110657 (Type A+ dual lane slide-rafts at PAX doors 4 LH/RH)

a. the limitations as per ESF D-39 are applicable.
b. the maximum operational passenger seating capacity and zonal capacities approved for emergency evacuation are:

For the positions and the loading conditions authorized in each position (references of containers, pallets and associated weights), see Weight and Balance Manual Chapter 1.10 ref. 00 V 080 A0001 / C9S.

2.7 Environmental Flight Envelope

Maximum operating altitude is 43,100 ft. Refer to approved Airplane Flight Manual.

2.8 Other Limitations

Refer to approved Airplane Flight Manual.

ALS-ETWF (Items of equipment subject to on-going Extent of Test without Failure), reference 00V207AETWF/C11 issue 5:
This document identifies temporary limitations due to ongoing tests. Since no failure occurred at time of TC this specific document ALS-ETWF contains temporary limitations that will be updated depending on test progress or deleted when tests are successfully completed. In case of failure, the failed item will be assessed for introduction in the ALS Part 4 at its demonstrated life limit.

For each item, the recorded progress of the ongoing test is sufficiently ahead of the anticipated fleet leader, even assuming the maximum utilisation rates provided in the approved MRBR.

2.9 Auxiliary Power Unit (APU)

One APU, Honeywell HGT1700.

Fuel and Oil: Refer to applicable approved Manuals.

2.10 Equipment

The equipment required by the applicable requirements shall be installed.

Cabin seats shall conform to the “Passenger Seat Frame Specification” document ref. 00V252K0005/C91 Issue 4.
2.11 All Weather Capabilities

The aircraft is qualified to Cat 3 precision approach and autoland.

2.12 Wheels and Tyres

</tbody>
</table>

2.13 Hydraulics

Fluid specifications: Refer to applicable Airbus Consumable Material List (CML) document.

2.14 Electrical Power Center Configuration Data File Tool

An Airline Configuration Tool (EPDS* Tool Suite) is being developed and qualified to allow airlines to manage the Configuration Data Files of Secondary Power Distribution Boxes (SPDB). This tool will be available post A350 Entry Into Service.
IV. OPERATING AND SERVICE INSTRUCTIONS

1. Aircraft Flight Manual

A350 Aircraft Flight Manual: STL 35000 (certification reference for TC: 00 V 101 A0941 / C95 Issue 4) or later approved revisions.

2. Maintenance Instructions and Airworthiness Limitations

- Safe Life Airworthiness Limitation Items are provided in the A350 Airworthiness Limitations Section (ALS) Part 1, Revision 00 (Document 00 V 050 ALS01 / C01 Issue 1, [1]);

- Damage-Tolerant Airworthiness Limitation Items are provided in the A350 Airworthiness Limitations Section (ALS) Part 2, Revision 00 (Document 00 V 050 ALS02 / C01 Issue 1, [1]);

- Certification Maintenance Requirements are provided in the A350 Airworthiness Limitations Section (ALS) Part 3, Revision 00 (Document 00 V 050 ALS03 / C01 Issue 2, [1]);

- A350 System Equipment Maintenance Requirements are provided in the A350 Airworthiness Limitations Section (ALS) Part 4, Revision 00 (Document 00 V 050 ALS04 / C01 Issue 1, [1]);

- A350 Fuel System Airworthiness Limitations are provided in the A350 Airworthiness Limitations Section (ALS) Part 5, Revision 00 (Document 00 V 050 ALS05 / C01 Issue 2, [1]);

- Maintenance Review Board Report 00 V 050 AMRBR / C01.

Except if documented in Aircraft documentation (Maintenance Procedures, Structural Repair Instructions, Electrical Standard Practices, Service Bulletins), all elements that are part of the Electrical Structure Network (ESN) shall not be modified, removed or repaired without agreement of Airbus.

Note [1]: Initial Revision and subsequent Variations (that may be compiled in a Revision) are approved under the EASA system. The applicable Airworthiness Limitation Section of the ICA is available on the AirbusWorld website.

3. ETOPS

The Type Design, system reliability and performance of the following A350 model(s) were found capable for Extended Range Operations (ETOPS) when configured, maintained and operated in accordance with the current revision of the ETOPS Configuration, Maintenance and Procedures (CMP) document, XWB/EASA: CS 25.1535/CMP.

This finding does not constitute an approval to conduct Extended Range Operations (operational approval must be obtained from the responsible Authority).
The following table provides details on the ETOPS approvals.

V. OPERATIONAL SUITABILITY DATA (OSD)

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate [original TC number] as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.

1. Master Minimum Equipment List
   a. The Master Minimum Equipment List has been approved as per the defined Operational Suitability Data Certification Basis and as documented in A350 MMEL (reference: STL 35100) first revision dated 06 November 2014, or later approved revisions.
   b. Required for entry into service by EU operator.

2. Flight Crew Data
   a. The Flight Crew data has been approved as per the defined Operational Suitability Data Certification Basis and as documented in “A350 Operational Suitability Data Flight Crew, (Ref: Airbus V01RP1505446 Issue 1, dated 05 May 2015)”, or later approved revisions.
   b. Required for entry into service by EU operator.
   c. Pilot Type Rating: The licence endorsement for the A350-900 series aircraft is "A330/A350". The A350-900 and the A330 series aircraft are variants of the same type of aircraft.

3. Cabin Crew Data
   a. The Cabin Crew data has been approved as per the defined Operational Suitability Data Certification Basis and as documented in “A350 Operational Suitability Data Cabin Crew, Issue 1.0. (Ref: Airbus V01RP1519368 dated 03 July 2015)”, or later approved revisions.
   b. Required for entry into service by EU operator.
   c. The A350-941 aircraft model is determined to be a variant to the A330-200/-300 aircraft model(s).
   d. The A350-941 model equipped with at least one pair of Type A+ exits is determined to be a variant to the A350-941 model equipped with Type A exits.
   e. The model A350-941 equipped with at least one pair of Type A+ exits is determined to be a variant to the A330-200/-300 aircraft models.
SECTION 2: A350-1000 SERIES

I. GENERAL

1. Type/Model
   A350-1041

2. Performance Class
   A

3. Certifying Authority
   EASA

4. Manufacturer
   AIRBUS S.A.S
   2 Rond-point Emile Dewoitine
   31700 Blagnac
   FRANCE

5. EASA Certification Application Date
   A350-1041: 30 July 2013

6. EASA Type Certification Date
   A350-1041: 21 November 2017
II. CERTIFICATION BASIS

The Certification Basis included in the below §1 to §7 is valid for all areas of the A350-1041 (no distinction between affected or non-affected areas).

1. EASA Certification Basis

The following EASA airworthiness standards are applicable:

- EASA Certification Specification 25, Amendment 13 – Large Aeroplanes
- EASA Certification Specification 25.851 (a) and (c) at Amendment 17 for the installation of halon free handheld fire extinguisher.
- EASA Certification Specification AWO, Initial Issue – All Weather Operations

- For type A+ emergency exit installation (see also ESF D-39), the following CS are applicable at amendment 20:
  
  CS 25.561(c), 25.601, 25.603(a)(b)(c), 25.605(a)(b), 25.789(a), 25.0795(d), 25.801(a)(d),
  25.0803(a)(c), 25.0807 (a)(7)(g)(i)(f), 25.809, 25.810(a)(1), 25.0811(d)(2)(g), 25.812(h)(k), 25.0813,

  For mixed configurations involving Type A, C and A+ emergency exits, except CS 25.795(d) and
  25.803(a)(c), the applicable CS may continue to be applied at an amendment that was applicable
  before the installation of type A+ emergency exits if the area is not affected by the type +
  installation.

- For modification 114947 installation or changes to the cowling or nacelle skin:
  
  CS 25.1193(e)(4)(f) amendment 22

2. Special Conditions

5. Environmental requirements

Fuel venting:
Certification Specification-34 amendment 1
ICAO Annex 16, Volume II, amendment 07, Part II, chapter II

Noise:
See TCDSN No. EASA.A.151

6. Reversions

Reversion to Amendment 8 is applied for paragraph CS 25.1322 “Flight Crew Alerting”.
7. Operational Suitability Data

The EASA Type Certification with respect to Operational Suitability Data (OSD) is defined as follows:

CCD: Certification Specifications and Guidance Material for Cabin Crew Data CS-CCD Initial Issue

MMEL: Certification Specifications for Master Minimum Equipment List CS-MMEL Initial Issue (Book 1 only)

FCD: Certification Specifications for Operational Suitability Data (OSD) Flight Crew Data CS-FCD Initial Issue
III. TECHNICAL CHARACTERISTICS AND OPERATIONAL LIMITATIONS

1. A350-1000 powered by RR engines

1.1 Type Design Definition

A350-1041 Type Design Definition: 00 V 000 A1041 / C10 Issue 2 or later approved issues

1.2 Engines

A350-1041: Two (2) Rolls Royce Trent XWB-97 turbofan engines
See Engine Type Certificate Data Sheet EASA E.111
Engine limitations: See Engine TCDS EASA.E.111.

1.3 Fuel and fuel additives

The fuel system has been certified with: JET A, JET A1, JP5, JP8, N° 3 Jet Fuel, RT and TS-1.

Refer to applicable Airbus Consumable Material List (CML) for additives.

1.4 Oil

Refer to applicable Airbus Consumable Material List (CML) document.

1.5 Limit Speeds

Refer to approved Airplane Flight Manual.

1.6 Centre of Gravity Range

Refer to approved Airplane Flight Manual.
1.7 Maximum Certified Weights

</tr>
</tbody>
</table>

Fuel density is 0.785 kg/l

2.3 Minimum Flight Crew

Two (2): Pilot and Co-pilot

2.4 Minimum Cabin Crew

For the A350-1000, the minimum required cabin crew number established during the aircraft certification process is 8, irrespective of the Maximum Operational Passenger Seating Capacity (MOPSC).

The above minimum cabin crew numbers are those demonstrated by the type certificate holder. A lower number is acceptable in the case of specific cabin layouts if documented in an EASA approved major design change or Supplemental Type Certificate (STC).

In accordance with the operational requirement ORO.CC.100-Number and composition of cabin crew, if the MOPSC for the specific aircraft exceeds 400, the minimum required cabin crew number becomes 9.
If, for the installation of Type A+ emergency exits, the modifications referenced in Section 2, part III, paragraph 2.5 are embodied, in addition a third cabin crew member must be stationed at each installed pair of Type A+ emergency exits.

2.5 Maximum Operational Passenger Seating Capacity

The zonal capacities certified on A350-941 (ref. Section 1, III, §2.5) are also considered acceptable for A350-1041. The zonal capacities certified on A350-1041 only are not acceptable for A350-941. The maximum number of passengers approved for emergency evacuation are:

<table>
<thead>
<tr>
<th>A350-1041 only</th>
<th>Max Pax</th>
<th>D1-D4</th>
<th>D2-D3</th>
<th>D3-D4</th>
<th>D1-D3</th>

</tbody>
</table>

If, for the installation of Type A+ emergency exits, the following modifications are embodied:
- Mod 115016 and 110972 and as applicable
- Mod 110654 (Type A+ dual lane slide-rafts at PAX doors 1 LH/RH) and/or
- Mod 110655 (Type A+ dual lane slide-rafts at PAX doors 2 LH/RH) and/or
- Mod 110656 (Type A+ dual lane slide-rafts at PAX doors 3 LH/RH) and/or
- Mod 110657 (Type A+ dual lane slide-rafts at PAX doors 4 LH/RH)
  a. the limitations as per ESF D-39 are applicable.
  b. the maximum operational passenger seating capacity and zonal capacities approved for
emergency evacuation are:

For the positions and the loading conditions authorized in each position (references of containers, pallets and associated weights), see Weight and Balance Manual Chapter CTL-LIM ref. 00 V 080 A0001 / C15.

2.7 Environmental Flight Envelope

Maximum operating altitude is 41,450 ft.

Refer to approved Airplane Flight Manual.

2.8 Other Limitations

Refer to approved Airplane Flight Manual.
ALS-ETWF (Items of equipment subject to on-going Extent of Test without Failure), reference 00V207AETWF/C11 issue 5:
This document identifies temporary limitations due to ongoing tests. Since no failure occurred at time of TC this specific document ALS-ETWF contains temporary limitations that will be updated depending on test progress or deleted when tests are successfully completed. In case of failure, the failed item will be assessed for introduction in the ALS Part 4 at its demonstrated life limit.

For each item, the recorded progress of the ongoing test is sufficiently ahead of the anticipated fleet leader, even assuming the maximum utilisation rates provided in the approved MRBR.

2.9 Auxiliary Power Unit (APU)
One APU, Honeywell HGT1700.

Fuel and Oil: Refer to applicable approved Manuals.

2.10 Equipment
The equipment required by the applicable requirements shall be installed.

Cabin seats shall conform to the “Passenger Seat Frame Specification” document ref. 00V252K0005/C01 Issue 1.

2.11 All Weather Capabilities
The aircraft is qualified to Cat 3 precision approach and autoland.

2.12 Wheels and Tyres

2.13 Hydraulics
Fluid specifications: Refer to applicable Airbus Consumable Material List (CML) document.

2.14 Electrical Power Center Configuration Data File Tool
An Airline Configuration Tool (EPDS* Tool Suite) is being developed and qualified to allow airlines to manage the Configuration Data Files of Secondary Power Distribution Boxes (SPDB). This tool will be available post A350 Entry Into Service.
IV. OPERATING AND SERVICE INSTRUCTIONS

1. Aircraft Flight Manual

A350 Aircraft Flight Manual: STL 35000 (certification reference for TC: 00 V 101 A1041 / C1S Issue 3) or later approved revisions.

2. Maintenance Instructions and Airworthiness Limitations

- Limitations applicable to Safe Life Airworthiness Limitation Items are provided in the A350 Airworthiness Limitations Section (ALS) Part 1 [1],

- Limitations applicable to Damage-Tolerant Airworthiness Limitation Items are provided in the A350 Airworthiness Limitations Section (ALS) Part 2 [1],

- Certification Maintenance Requirements are provided in the A350 Airworthiness Limitations Section (ALS) Part 3 [1],

- System Equipment Maintenance Requirements are provided in the A350 Airworthiness Limitations Section (ALS) Part 4 [1],

- Fuel System Airworthiness Limitations are provided in the A350 Airworthiness Limitations Section (ALS) Part 5 [1].

- Maintenance Review Board Report 00 V 050 AMRBR / C01 issue 2.

Except if documented in Aircraft documentation (Maintenance Procedures, Structural Repair Instructions, Electrical Standard Practices, Service Bulletins), all elements that are part of the Electrical Structure Network (ESN) shall not be modified, removed or repaired without agreement of Airbus.

Note [1]: Initial Revision and subsequent Variations (that may be compiled in a Revision) are approved under the EASA system. The applicable Airworthiness Limitation Section of the ICA is available on the AirbusWorld website.

3. ETOPS

The Type Design, system reliability and performance of the following A350 model(s) were found capable for Extended Range Operations (ETOPS) when configured, maintained and operated in accordance with the current revision of the ETOPS Configuration, Maintenance and Procedures (CMP) document, XWB/EASA: CS 25.1535/CMP.

This finding does not constitute an approval to conduct Extended Range Operations (operational approval must be obtained from the responsible Authority).

The following table provides details on the ETOPS approvals.

<table>

V. OPERATIONAL SUITABILITY DATA (OSD)

The Operational Suitability Data elements listed below are approved by the European Union Aviation Safety Agency under the EASA Type Certificate [original TC number] as per Commission Regulation (EU) 748/2012 as amended by Commission Regulation (EU) No 69/2014.

1. Master Minimum Equipment List
   a. The Master Minimum Equipment List has been approved as per the defined Operational Suitability Data Certification Basis and as documented in A350 MMEL (reference: STL 35100), first revision at Type Certification date, or later applicable revision.
   b. Required for entry into service by EU operator.

2. Flight Crew Data
   a. The Flight Crew data has been approved as per the defined Operational Suitability Data Certification Basis and as documented in “Operational Suitability Data – Flight Crew – A330/A350 (ref: A330 350 FCDR update for A350-1000_V00RP1731843_v1.0, dated 13 October 2017), or later approved revisions.
   b. Required for entry into service by EU operator.
   c. Pilot Type Rating: The licence endorsement for the A350-900 and A350-1000 series aircraft is “A330/A350”. The A350-900, the A350-1000 and the A330 series aircraft are variants of the same type of aircraft.

3. Cabin Crew Data
   a. The Cabin Crew data has been approved as per the defined Operational Suitability Data Certification Basis and as documented in “A350 Operational Suitability Data Cabin Crew, Issue 2 (Ref: Airbus V01RP1519368 dated 17 May 2017)”, or later approved revisions.
   b. Required for entry into service by EU operator.
   c. The A350-1041 model is determined to be the same aircraft type as the A350-941 model. The A350-941/-1041 model(s) are determined to be variants to the A330-200/-300 aircraft model(s).
   d. The A350-1041 model equipped with at least one pair of Type A+ exits is determined to be a variant to the A350-1041 model equipped with Type A exits.
   e. The model A350-1041 equipped with at least one pair of Type A+ exits is determined to be a variant to the A330-200/-300 aircraft models.
