TE.GEN.00409-001

# Actions Following the Accident

- EASA is complying with a mandate of the European Commission to look into the accident of 4U9525.
- In the Task Force organised to fulfil this role participated 14 senior experts from airlines, flight crew associations, medical advisors and authorities.
- Discussions involved the design of cabin doors, aeromedical checks, pilot's work environment and the abuse of alcohol and drugs.

# Recommendations

1. Two persons in the cockpit at all times.
2. Psychological evaluation of pilots as part of training or before entering service.
3. Random drugs and alcohol testing by the operator.
4. Oversight programme over the performance of aero-medical examiners.
5. Balance patient confidentiality and protection of public safety.
6. Implement pilot support and reporting systems.

# Objectives of the Workshop

1. The Recommendations have already public and will not be modified.
2. We will discuss their implementation:
  - Format
  - Priorities
  - Which actions have a legislative impact
  - Monitorisation of implementation
  - Actions following BEA publication of the results of the investigation
