Subject: Fifth EASA Rotorcraft Symposium

Dear Sir, dear Madam,

The highly successful EASA Rotorcraft Symposium is back for another year. I am pleased and excited to invite you to attend the "Fifth EASA Rotorcraft Symposium" to be held at the Pullman Hotel, Helenenstrasse 14, 50667 Köln, Germany, on 7th and 8th December 2011.

Building on the successes of previous years we aim to make this year's event better than ever and so it should be the event in the year not to be missed. The Symposium has become a regular forum for the worldwide rotorcraft community, where topics of common interest in the rotary wings world are presented and discussed, aiming at updating participants, and getting their feedback, on industry and authority initiatives concerning operational, design, manufacturing and regulatory matters, with the common scope of fostering safety.

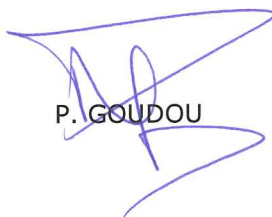

While the agenda for this year is still in flux we anticipate an interesting collection of papers for your delight. Last year we concentrated on NVIS and we will surely update you on the developments in this area over the last 12 months along with other equally interesting topics. You are requested to indicate your interest by completing the "registration form" on the EASA website (Events), and to submit it via e-mail, to marina.spinello@easa.europa.eu before Sunday 27 November 2011. The workshop is only accessible to registered participants, who will receive confirmation of participation. The Agency levies an administrative fee of €100 from all symposium participants (speakers and press free of charge).

This event will be published on the EASA Website (Events):
<http://easa.europa.eu/events/events.php>. You are invited to visit it regularly for updates.

For additional information, please contact Ms. Marina Spinello by email at marina.spinello@easa.europa.eu or by phone at +49 221 89990 4110.

Additionally, we would like to inform you that a dedicated workshop on Helicopter Ditching, Water Impact & Survivability will be held just prior to the EASA Rotorcraft Symposium on 5th & 6th December here in Cologne. Further information can be found on the EASA website under "Events".

Yours sincerely,

P. GOUDOU
