

The European Aviation Safety Programme

EASP

- 1. History*
- 2. Issues*
- 3. Working Method*
- 4. Timescales*

History

Original EASAC Working Group

EASA revisions

*Commission revisions and
publication with a Communication*

Original Issues

"Ownership" EASA? Commission?

Aspirational vs Current Situation

Format – e.g. Deming vs ICAO

Problems with 1st Edition

- 1. Rushed in order to publish with the Communication*
- 2. No clear template for a regional SSP*
- 3. Issued during a rapidly changing period*

Update

- 1. Need to bring it up to date with all the changes*
- 2. Need to encompass the move towards a pro-active, evidence based approach*

Current Issues

- 1. New Annex 19 on Safety management*
- 2. Description of the process to produce the EASp*
- 3. Use of a Gap Analysis for MS to use for their own SSPs*

Working Method/Timescales

EASAC WG lead by Commission with participation from MS

Via e-mail & meetings

First draft to the EASAC in November 2013

Final draft to EASAC in February 2013

EASA MB in March 2014

Commission decision and publication circa late Spring 2014
