

12 April 2022

## Certification and oversight of RVSM, LVO, EFB Training

The objective of the training was to increase knowledge on applicable requirements and specifically NAA procedures and associated checklists used, emphasising practical examples for each type of specific approval and to improve transposition and implementation capabilities of the Commission Regulation (EU) No 965/2012.

The experts provided several case studies that generated a lot of interest. Throughout the course and in conclusion, emphasis was placed on the NAA inspector's work methodology and the chronological order to be respected in order to evaluate and issue RVSM, LVO and EFB approvals.

The activity was implemented from 05 – 08 April 2022 online.  
In total 24 participants from 7 project beneficiary countries attended the training.

*The "EASA-IPA5" project is funded by the European Union and implemented by EASA*
