Aerodrome Apron Management Training

The specific objective of this training was to support the transposition and implementation of the EU aviation acquis by strengthening the implementation capacities of the project beneficiary countries. Specifically, the activity was focused on the apron management at certified airports, including the aerodrome manual procedures, the certification specifications associated to apron configuration and the implementation of the new Regulation (EU) 2020/1234 (amending Regulation (EU) 139/2014) regarding apron management services.

Experts from Spanish AESA provided an overview of provisions related to apron management from both NAA and aerodrome operator perspective, highlighting implementation considerations, real case scenarios and sharing experiences and best practices regarding apron management and oversight activities.

The activity was implemented from 04 – 06 May 2022 in Skopje, Republic of North Macedonia. In total 21 participants from 6 project beneficiary countries attended the training.
