OSD Implementation Support

The objective of the on-site support is to improve CAD RS approval and oversight capability to ensure standardized implementation of Operational Suitability Data (OSD) Flight Crew Data (CS-FCD) by Serbia's operator into their trainings- and checking programs.

Experts from Austrocontrol provided an overview of provisions related to OSD and answered questions prepared by Civil Aviation Directorate of Republic of Serbia experts. The activity was designed as a red thread (guideline), to provide a comprehensive overview about the applicable requirements, an explanation to the OSD-process with examples from practice to enable a common understanding and work out answers to concrete issues to support standardization of approval process and oversight for individual training and checking programs.

The activity was implemented in period 16 – 18 May 2022 in Belgrade, Republic of Serbia.
In total 9 participants from Civil Aviation Directorate of Republic of Serbia participated in the activity.
