

## EASA Certification Information - Final

**No.:** 2023-14, Revision 1  
**Issued:** 22 January 2024

**Subject:** Surrender of EASA Type Certificate No. EASA.P.037 affecting SOCIETE DUC FLAIR-2 Series Propellers

**Type Certificate No.:** EASA.P.037

**Affected model(s):** H-FLR2\_5-D-I\_C

**Issue date:** 1 June 2018

**Issued by:** EASA

**Type Certificate Holder:** SOCIETE DUC t/a DUC Hélices Propellers

**Background:** The holder of Type Certificate EASA.P.037 surrendered its TC for the H-FLR2\_5-D-I\_C propeller models.

The H-FLR2\_5-D-I\_C model, the only model of the FLAIR-2 propeller type was initially certified by EASA on 07 July 2016.

SOCIETE DUC has then informed EASA that FLAIR-2 Series Propellers are no more produced and that, to their knowledge, there are no more propellers of this type being operated. Consequently, the TC for this propeller type is surrendered.

From 21 December 2023 until 21 January 2024 EASA had published the Certification Information 2023-14 to communicate the surrender to the public and invited to comment on it.

Until 21 January 2024 EASA received no comments.

With the deletion of the H-FLR2\_5-D-I\_C from, and the subsequent update of the EASA Product List at <https://www.easa.europa.eu/en/datasets/easa-product-list> the surrender of Type Certificate P.037 becomes effective.
