

Steve Arrowsmith

Steve Arrowsmith has worked in the area of aviation and environmental protection for the last 25 years, and in EASA since 2005 where he is currently the Chief Expert – Environmental Protection. He has previously led work in developing global environmental standards on aircraft NO_x and CO₂ emissions, as well as market-based measures. In 2020, he coordinated the work on the EASA report that provided an updated analysis of the non-CO₂ climate impacts of aviation and potential policy mitigation measures. In addition, he leads the work on the triennial EASA European Aviation Environmental Report, which provides an objective overview on the environmental performance of the European aviation sector, and how it can be improved.
