

## CV Theo Rindlisbacher (2024)

Theo Rindlisbacher is a physicist who originally specialized in atmospheric physics. Today, he is an aircraft emission measurement and modelling expert with more than 20 years of experience in this field. He is working in the environmental section of the Swiss Civil Aviation Authority FOCA and is member of the ICAO CAEP emissions technical working group, developing and improving international aircraft emission standards. He has been heavily involved in the development of the new ICAO non-volatile particle emission standards and in improving assessment of aircraft cruise emissions.
