- Hello, Zoran BNX present and available
- The possibility to querry a database of reports/data/intelligence, in order to facilitate proactive safety management processes such as risk assessment/management of change related to a particular activity/location/service, etc.
- Since reporting platforms are not accessigble to all levels, would be great if EASA could create a "lessons learned news flyer" with occurences reported in the past (month/quarter/year) to other stakeholders that might occure to other organizations using same procedures/equipments etc.
- Will there be available dataanalysis (e.g pivots.....)on a national level on occurrences within groundhandling.
- “I would be interested in understanding how EASA is
