1. Overview of iHub

ACI World Intelligence Hub (iHub)

- A comprehensive data intelligence platform developed by ACI World.
- Extensive and accurate commercial airport traffic data,
  enabling users to monitor and analyze passenger, cargo, and aircraft movements globally.
- Support for strategic planning and decision-making across the air transport and travel ecosystem.

1. Overview of iHub

Analyst Module

Analyst

Annual and monthly datasets.

Access and interact with the most current passenger and cargo data available any time.

Analyze data to meet your unique needs. Ideal to conduct analysis across a mixture of datasets.

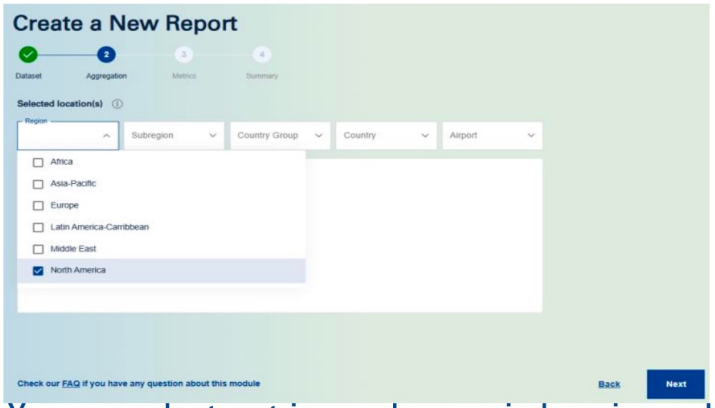

*** Access historical datasets from 2000-2018 capturing passenger and cargo trends pre-COVID is a separate service.**

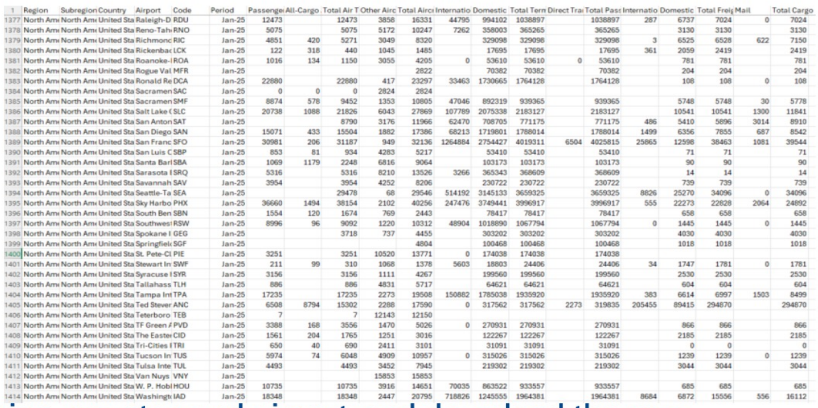

https://intelligencehub.aci.aero/ihub

1. Overview of iHub

Analyst Module

You can select metrics such as period, region, subregion, country, and airport, and download the raw data.

Monthly data includes approximately 1,300 airports, representing about 80% of global traffic.
Annual data covers approximately 2,700 airports, accounting for around 95% of global commercial traffic.

***Coverage may vary early in the month or year.**
