TYPE-CERTIFICATE
DATA SHEET

No. EASA.P.177

for
KW-3(x) series propellers

Type Certificate Holder
Aleš Křemen
Vodolská 4, Dolínek
250 70 Odolena Voda
Czech Republic

For Models:
KW-30
KW-31

II. Certification Basis

1. State of Design Authority Certification Basis
Czech Republic

2. Reference Date for determining the applicable airworthiness requirements
01 March 2013

3. EASA Certification Basis

3.1. Airworthiness Standards
CS-P Amendment 2 as published with ED Decision 2020/006/R dated 24 June 2020

3.2. Special Conditions
None

3.3. Equivalent Safety Findings
None

3.4. Deviations
None
III. Technical Characteristics

1. Type Design Definition
Each design configuration is defined by a main assembly drawing and an appropriate parts list.

The KW-30 propeller model covers the following design configurations.
Design Configuration “Constant Speed”
Drawing No. 30-000-000 dated 21 January 2014 (*1)
Above mentioned drawing contains Parts List

The KW-31 propeller model covers the following design configurations.
Design Configuration “Constant Speed”
Drawing No. 31-000-000 dated 21 January 2014 (*1)
Above mentioned drawing contains Parts List

(*1) effective is the declared issue or a later approved revision.

2. Description
The KW-30, resp. KW-31, propeller models are a 3-blade hydraulically, resp. electrically controlled variable pitch propellers. Provided that the power unit is equipped by hydraulic, resp. electric governor the propellers could work as a constant speed propeller.
The hub is milled out of aluminium alloy and the blades are made of wood with glass or carbon composite covering layer. The leading edge of the blade is protected by the metal stamping or polyurethane cast.

3. Equipment
Spinner: according to Aleš KŘEMEN Service Bulletin No. 2
Governor: according to Aleš KŘEMEN Service Bulletin No. 3

4. Dimensions
Propeller diameter: max. 195 cm (77“)

5. Weight
KW-30: approx. 12.5 kg (27.6 lb)
KW-31: approx. 14.0 kg (30.9 lb)

6. Hub/Blade Combinations

<table>
<thead>
<tr>
<th>Hub</th>
<th>Blade - Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>KW-30</td>
<td>-031, -033, -034, -037, -038</td>
</tr>
<tr>
<td>KW-31</td>
<td>-031, -033, -034, -037, -038</td>
</tr>
</tbody>
</table>

7. Control System
Propeller governors as listed in Aleš KŘEMEN Service Bulletin No. 3.

8. Adaptation to Engine
Adaptation to engine as listed in Aleš KŘEMEN Service Bulletin No. 4.

9. Direction of Rotation
Direction of rotation (viewed in flight direction) as identified by a letter-code in the propeller
designation. (see chapter VI.3.). The left-hand version of an approved propeller model is approved at the same rating and diameter as listed for the right-hand model.

**IV. Operating Limitations**

1. **Maximum Take Off Power and Speed**

**104 kW**
- all blades except Type -037, -038: max. 2552 min⁻¹
- blades Type -037, -038: max. 2283 min⁻¹

**117 kW**
- blades Type -031, -034, -037: max. 2283 min⁻¹
- blades Type -038: max. 2323 min⁻¹ - max. 3 min
  max. 2441 min⁻¹ - max. 1 min

2. **Maximum Continuous Power and Speed**

**104 kW**
- all blades except Type -037, -038: max. 2552 min⁻¹
- blades Type -037, -038: max. 2283 min⁻¹

**117 kW**
- blades Type -031, -034, -037, -038: max. 2283 min⁻¹

3. **Propeller Pitch Angle**

Maximum pitch change range +5° to +50° - measured at 75% radius station

**V. Operating and Service Instructions**

VI. Notes

1. The EASA approved Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness is published in the applicable “User Manual” document, chapter 17 “Airworthiness Limitations Section”. This ALS section is empty because no life limit is necessary for these models.

2. The overhaul intervals recommended by the manufacturer are listed in Aleš KŘEMEN Service Bulletin No. 1.

3. Propeller designation system:

   **HUB:**

   1  KW  Aleš KŘEMEN, Vodolská 4, Dolínek, 250 70 Odolena Voda, Czech Republic

   2  No. of propeller model

   3  Code letter for propeller category:
      A - Automatic Propeller
      F - Fixed Pitch Propeller
      G - Ground Adjustable Propeller
      V - Variable Pitch Propeller

   4  Code letter for blade pitch change system:
      H – Hydraulic
      E – Electric
      M – Mechanical

   5  Number of blades installed

   6  Code letter for feathering system:  
      F – Feather position installed
      0 – No feather position possible

   7  Code letter for reverse provision:  
      R – Reverse position installed
      0 – No reverse position possible

   8  Code letter for flange type:  
      listed in Aleš KŘEMEN Service Bulletin No. 4

   **BLADE:**

   9  Code letter for blade design and installation:
      R:  - Right-hand tractor
      RP:  - Right-hand pusher
      L:  - Left-hand tractor
      LP:  - Left-hand pusher

   10  Propeller diameter in cm

   11  No. of blade type (contains design configuration and aerodynamic data) according to the certified hub/blade-combinations.
