

INTERNATIONAL CIVIL AVIATION ORGANIZATION

A United Nations Specialized Agency

EASA / FAA International Aviation Safety Conference

**Training: Creating Today The Expertise For
Tomorrow.**

12th – 14th June 2013 – Paris, France

Gaoussou KONATE
Deputy Regional Director
WACAF – Dakar

What aviation professions will see a shortage in the short and long term

- Acute in short term
 - Aircraft maintenance technicians and;
 - Pilots
- In long term
 - Aircraft maintenance technicians
 - Pilots and;
 - Controllers

What approaches are you developing or implementing to address real or potential aviation professional shortages?

- Promote aviation professions
 - Passion can still be ignited and sustain among the youth in Africa
 - Majority of the parents cannot afford training cost
- Harmonization and standardization
 - Training implementation in cooperation / partnership

ensure a sustainable qualified pool of aviation professionals are in place to meet the global demand?

- Implement collaborative decision making process to:
 - Set globally harmonized professional standards and
 - Partner to produce enough professionals to meet the global shortage needs

NGAP - What other ways can regional partners use to leverage resources and opportunities for training?

- Any other regional initiative must be taking in addition to NGAP then
 - Partnership for training opportunities at regional level
 - Assess the effect of the outcome of such partnership on safety and efficiency at regional level;
 - Assess also the contribution of such partnership on mitigating the global shortage with even gains in safety and efficiency at global level

ICAO

Uniting Aviation on

Safety | Security | Environment

THANK YOU
