Global Production: The New Reality

Peter Corbeel
Initial Airworthiness Manager
14 June 2013

Your safety is our mission.
easa.europa.eu

Ultimate objective:

‘locally approved – globally accepted’

Global Production: Challenges

- Global network of design and production for one product
 - Number of aircraft designers increases
 - Manufacturers spread their activities
- Regulations based on business models of the 1970/80-ies
- Differences in regulations
- Spreading of responsibilities: industry and authorities
- Arrangements between industry entities and oversight of these

Global Production: Opportunities

- **Already:**
 - Bilateral agreements
 - Industry standards (e.g. AS/EN 9100)
- **Possible ideas for future consideration:**
 - **Modular approach in design approval:**
 - Design and production responsibility closer together
 - **Bigger role of ICAO**
 - Better SARPS; fewer differences
