Rulemaking Focused on Safety Data
Current Work in the United States affecting Airlines

» **Industry Reactive Tools**

- Accident Data – Traditional

- Incident Data - Aviation Safety Information and Sharing (ASIAS)

» **Industry Proactive Tools**

- Risk Assessment within Change Management

- Industry efforts – Aviation Team Looking Ahead at Safety (ATLAS)

» **Industry Predictive Tools**

- Rising Trend data – Traditional

- Industry efforts - ASIAS Vulnerability Discovery

Using all three tools the deployment of voluntary safety enhancements through CAST continues to gather momentum on risk reduction ahead of the regulation
