

Performance Based Navigation

Benefits to Safety,
Efficiency, and
Environment

Federal Aviation
Administration

Benefits of PBN -

- **Predictable and repeatable flight tracks offer reductions in ATCO Workload and flight crew workload and reduced pilot/controller communications**
- **Allows more efficient airspace design and reduces dependencies in complex airspace**
- **Provides for curved paths and transitions**
- **Provides greater access to airports**
- **VMC like capacity during IMC conditions**

Benefits of PBN -

- **Performance monitoring and alerting**
- **Greater assurance to safety**
- **Reduced arrival/departure delay improves on-time performance**
- **Reduced fuel burn means reduced carbon emissions**
- **Reduced noise**

Progress in Oceanic Airspace

FAA Activities -

- **Integrating efforts with the Performance Based Operations Aviation Rulemaking Committee (PARC)**
- **NextGen Advisory Committee**
- **Outreach Meetings with operators, pilots, manufacturers, etc.**
