Executive Summary

The Agency's RMT.0637 addresses a regulatory issue related to portable electronic devices (PEDs), and includes amendments to Part-CAT, -NCC, -NCO and -SPO. There is no safety recommendation linked to this rulemaking task.

The specific objective is to enable the expanded use of PEDs during various phases of flight by reviewing and updating the operational provisions related to the PED policy.

With RMT.0637 the Acceptable Means of Compliance (AMC) and Guidance Material (GM) are amended by adhering to the following approach:

1. The operator has to ensure that PEDs have no negative impact on the safe operation of the aircraft, i.e. the operator has to demonstrate that PEDs do not interfere with on-board electronic systems and equipment.

2. In accordance with 1., the use of PEDs may be granted under the responsibility of the operator, i.e. the operator decides which PED may be used during which phases of the flight.

In this context, GM is amended in Part-NCO.

The proposed changes are expected to establish a more reasonable and more passenger friendly framework for the use of PEDs. These changes will give operators reliable tools to mitigate PED-related risks and hazards, and, therefore, are expected to maintain a high uniform level of safety during all phases of flight.

1. **Procedural information**

1.1. **The rule development procedure**

The European Aviation Safety Agency (hereinafter referred to as the ‘Agency’) developed this Decision in line with Regulation (EC) No 216/2008\(^1\) (hereinafter referred to as the ‘Basic Regulation’) and the Rulemaking Procedure\(^2\).

This rulemaking activity is included in the Agency’s 4-year Rulemaking Programme under RMT.0637\(^3\). The scope and timescale of the task were defined in the related Terms of Reference (see process map on the title page).

All interested parties were consulted through the Notice of Proposed Amendment (NPA) 2014-14\(^4\). 131 comments were received from interested parties, including industry and National Aviation Authorities.

The Agency has reviewed the comments received on the NPA. The comments received and the Agency’s responses are documented in the Comment-Response Document (CRD) 2014-14\(^5\).

The final text of this Decision with the Guidance Material (GM) has been developed by the Agency.

The process map on the title page summarises the major milestones of this rulemaking activity.

1.2. **Structure of the related documents**

Chapter 1 contains the procedural information related to this task. Chapter 2 explains the core technical content. The text of the AMC/GM is annexed to the ED Decision.

---

\(^2\) The Agency is bound to follow a structured rulemaking process as required by Article 52(1) of the Basic Regulation. Such process has been adopted by the Agency’s Management Board and is referred to as the 'Rulemaking Procedure'. See Management Board Decision concerning the procedure to be applied by the Agency for the issuing of opinions, certification specifications and guidance material (Rulemaking Procedure), EASA MB Decision No 01-2012.

\(^4\) In accordance with Article 52 of the Basic Regulation and Articles 5(3) and 6 of the Rulemaking Procedure; NPA available at http://easa.europa.eu/document-library/notices-of-proposed-amendment.

2. **Explanatory Note**

2.1. **Overview of the issues to be addressed**

Portable electronic devices (PEDs) are any kind of electronic devices brought on board the aircraft by crew members, passengers or as part of the cargo, and that are not included in the approved aircraft configuration. The use of PEDs on board the aircraft, either by the pilot-in-command and passengers or included in the cargo, presents a source of uncontrolled electromagnetic emission with potential risk of adverse interference effects to aircraft systems.

PEDs fall into two main categories: non-intentional transmitters and intentional transmitters (T-PEDs). The first category includes, but is not limited to, calculators, cameras, radio receivers, audio and video players, electronic games and toys. Intentional transmitters are transmitting devices such as remote control equipment (which may include some toys), two-way radios, mobile phones of any type, satellite phones, tablet and laptop computers, e-readers, Global Navigation Satellite System (GNSS) cargo tracking devices and others.

Aside of this Decision concerned with Annex VII (Part-NCO), other Decisions, related to the same subject matter introduce AMC/GM to Annex IV (Part-CAT), Annex VI (Part-NCC) and Annex VIII (Part-SPO).

2.2. **Objectives**

The overall objectives of the EASA system are defined in Article 2 of the Basic Regulation. This proposal will contribute to the achievement of the overall objectives by addressing the issues outlined in this chapter of the NPA.

The specific objective is to enable the expanded use of any kind of PEDs during various phases of flight by reviewing and updating the operational provisions related to PED policy.

2.3. **Outcome of the consultation**

As mentioned above, the Agency has received 131 comments towards NPA 2014-14 during the public consultation period. Additional comments were received during a two-day focussed consultation with stakeholders after the end of the NPA-consultation period. An overall description of the changes resulting from these comments is provided in CRD 2014-14. Concerning this Decision, the Agency made the following change, compared to the GM presented in NPA 2014-14:

**Fire caused by PEDs:** Reference material concerning ‘Fire caused by PEDs’ has been reduced to ICAO Doc 9481, since this document mainly contains the information contained in the UK CAA documents. In addition, this item is not a separate GM any longer, but has been incorporated as one sub-item in GM2 NCO.GEN.125.

2.4. **Overview of the amendments**

NPA 2014-14 provides a detailed description of the amendments originally proposed by the Agency. Following the comments received, the Agency modified the GM of Annex VII (Part-NCO) as described in Paragraph 2.3. In addition, editorial changes have been made. The final text is provided in a separate Annex to this Decision.
