Resieri MARCATO
EMBRAER S.A.

EASA DOA Workshop

Cologne

18-19NOV15

Standardisation of Design Supplier Surveillance
A European Industry initiative supported by other parties

Company

- Embraer S.A. (www.embraer.com.br)
- Resieri **Marcato** (Organisational Designations Procedures Manager)

Objectives

- Brazilian regulatory framework similar to EASA DOA
- Embraer DOA for Large, Commuter and Normal Airplanes

Involvement of Aviation Agencies

- Civil – ANAC has a Project with Embraer participation and will establish a technical agreement with EASA
- Civil – EASA Embraer brazilian staff working for OGMA EASA DOA (Minor Repairs and Flight Cond. for PTF)
- Military – DCTA-IFI has established OPC, Embraer DOM approved and OPC will be granted in 2017

Benefits

- Governmental and Industry resources optimization
- Increases safety of the products – SMS and new technology delivered earlier
- Improves the accountability framework

Challenges

- Level of involvement of Agency's staff in documents verification and tests not defined in regulations – risk of misunderstanding about the accountability of independent checking functions
- Scope of review and drilling held by Agency's staff not defined in regulations – unexpected efforts on rechecking
- Step for evaluation of the DOA outputs performed by Agency staff is not defined in the Regulation – uncertainty for the certification project conclusion
