Implementation of CAEP/9 amendments
Update of AMC and GM to Part-21

EXECUTIVE SUMMARY
This Decision addresses an environmental issue related to aircraft noise and aircraft engine emissions.

The Decision is linked to ICAO State Letters AN 1/17.14-14/24 and AN 1/17.14-14/25 on the adoption of Amendments 11 and 8 to Annex 16, Volumes I and II respectively.

The specific objective is to provide a high uniform level of environmental protection in the European Union (EU) as well as a level playing field for all actors in the aviation market by aligning European Union legislation with the latest ICAO standards and recommended practices (SARPs) and guidance material (GM) on aircraft noise and aircraft engine emissions. The new amendments to these SARPs and GM were approved by the ICAO Committee on Aviation Environmental Protection at its 9th meeting (CAEP/9) in February 2013 and adopted by the ICAO Council at its 201st meeting in March 2014.

Amendment 11 to ICAO Annex 16, Volume I introduces a new noise standard for subsonic jet and heavy propeller-driven aircraft (Chapter 14), which includes an increase in stringency of 7 effective perceived noise level in decibels (EPNdB) (cumulative) relative to the current Chapter 4 limits. Said Amendment also upgrades the current guidance on the noise certification of tilt-rotors in Annex 16, Volume I, Attachment F to a new noise standard for tilt-rotors (Chapter 13).

Amendment 8 to ICAO Annex 16, Volume II addresses various technical issues arising from the application of the ICAO SARPs and related guidance on aircraft engine emissions certification. There are no changes to the emissions limits. All changes to Volume II are considered to be stringency-neutral.

This Decision incorporates CAEP/9 amendments into AMC and GM to Annex I (Part-21) to Commission Regulation (EU) No 748/2012. These changes ensure compliance with the latest ICAO SARPs on aircraft noise and aircraft engine emissions.

1. **Procedural information**

1.1. **The rule development procedure**

The European Aviation Safety Agency (hereinafter referred to as the ‘Agency’) developed ED Decision 2016/003/R in line with Regulation (EC) 216/2008¹ (hereinafter referred to as the ‘Basic Regulation’) and the Rulemaking Procedure².

This rulemaking activity is included in the Agency's 4-year Rulemaking Programme under RMT.0172 (BR.012), RMT.0083 (34.003) & RMT.0086 (36.007). The scope and timescale of the task were defined in the related Terms of Reference (ToR) (see also process map on the title page).

The draft text of this Decision has been developed by the Agency based on the outcome of the 9th meeting of the ICAO Committee on Aviation Environmental Protection (CAEP/9) and the 201st meeting of the ICAO Council. All interested parties were consulted through notice of proposed amendment (NPA) 2014-15³. 9 comments were received from interested parties, including industry (2 comments) and national aviation authorities (NAAs) (7 comments).

The Agency reviewed the comments received during the consultation. Comments received and the Agency’s responses thereto were presented in the comment-response document (CRD) 2014-15. Based on the comments received, the Agency published Opinion No 05/2014 on 17 December 2014 which was addressed to the European Commission (EC). The related Regulation (EU) No 2015/5⁴ was adopted on 5 January 2016.

The final text of this Decision with the acceptable means of compliance (AMC) and guidance material (GM) has been developed by the Agency.

The process map on the title page summarises the major milestones of this rulemaking activity.

1.2. **Structure of the related documents**

Chapter 1 contains the procedural information related to this task. Chapter 2 explains the core technical content. The amended text of AMC and GM to Part-21 is annexed to the ED Decision.

---

² The Agency is bound to follow a structured rulemaking process as required by Article 52(1) of the Basic Regulation. Such process has been adopted by the Agency’s Management Board and is referred to as the ‘Rulemaking Procedure’. See Management Board Decision concerning the procedure to be applied by the Agency for the issuing of opinions, certification specifications and guidance material (Rulemaking Procedure), EASA MB Decision No 01-2012 of 13 March 2012.

³ In accordance with Article 52 of the Basic Regulation and Articles 5(3) and 6 of the Rulemaking Procedure.

2. Explanatory Note

2.1. Overview of the issues to be addressed

The ICAO Council adopted the amendments to its Annex 16 at its 201st meeting in March 2014 as proposed by the Committee on Aviation Environmental Protection at its 9th meeting in February 2013 (CAEP/9). These amendments include the introduction of a new noise standard for subsonic jet and heavy propeller-driven aircraft (Annex 16, Vol I, Chapter 14) as well as for tilt-rotors (Annex 16, Vol I, Chapter 13).

Following the Agency’s Opinion No 05-2014, the European Commission amended Article 6 of the Basic Regulation and Annex I (Part-21) to Regulation (EU) No 748/2012\(^5\) to align both regulations with the latest amendments of ICAO Annex 16, Vols I and II, as well as with the respective chapters of these volumes. AMC and GM to Part-21 now need to be amended to ensure that all EU regulations in the field of aviation environmental protection are aligned with the latest ICAO standards and recommended practices (SARPs).

2.2. Objectives

The overall objectives of the EASA system are defined in Article 2 of the Basic Regulation. This Decision will contribute to the achievement of the overall objectives by addressing the issues outlined in Chapter 2. The specific objective of this proposal is, therefore, to ensure a high uniform level of environmental protection, as well as to provide a level playing field for all actors in the aviation market, by aligning the Agency’s rules with the ICAO SARPs (ICAO Annex 16).

2.3. Overview of the amendments to AMC and GM to Part-21

The amendments to AMC and GM to Part-21 are similar to those initially presented in NPA 2014-15. The changes essentially consist in adding the new chapters of ICAO Annex 16, Vol I to GM on noise certificates (Part-21, Section B, Subpart I). A few minor typos and other errors have also been corrected to improve the clarity of said GM.
