

SAFETY IN AVIATION FORUM FOR EUROPE

13-15
MAY 2019

BRUSSELS

360°
AN ALL-ROUND
PERSPECTIVE ON
AVIATION SAFETY

WHAT IS SAFE?

The Safety in Aviation Forum for Europe (SAFE) is an **exciting, new collaborative event** hosted by EASA that will support the European Safety Risk management cycle. This will complement the **Data4Safety** programme and will provide a **360° perspective on aviation safety**. The outcome of this forum will support our common understanding of what are the main safety challenges that need to be addressed in the European Safety Risk Management process (SRM).

WHO SHOULD ATTEND?

The goal of SAFE is to bring together all the different actors and specialisms in commercial fixed wing operations including Regulators, Manufacturers, Flight Crew, ATC, Engineers, Airports and Ground Handling Organisations to share their experiences on managing safety risks and issues.

WHAT CAN I EXPECT AT SAFE?

SAFE will provide a forum for Senior Safety Leaders to share their vision on what are the key safety issues facing aviation today. It will encourage exchange between the different disciplines on how we can practically manage these safety issues together in a spirit of collaboration. You will get that chance to take part in exchanges with colleagues from across the aviation community and contribute to the SRM.

SOUNDS EXCITING, WHERE CAN I FIND OUT MORE?

EASA will provide information on the full Agenda in the coming weeks as well as full details on how to register for this exciting event. Follow EASA on Facebook, LinkedIn and Twitter to make sure you don't miss the next update on SAFE.
