TYPE-CERTIFICATE
DATA SHEET

No. IM.E.101

for
Continental C90 & O-200 series engines

Type Certificate Holder
Continental Aerospace Technologies, Inc.
2039 Broad Street,
Mobile, Alabama 36615, USA

For Models:

Continental C90-8F
Continental C90-8FJ
Continental C90-12F
Continental C90-12FH
Continental C90-12FJ
Continental C90-12FP
Continental C90-14F
Continental C90-14FH
Continental C90-14FJ
Continental C90-16F
Continental O-200-A
Continental O-200-B
Continental O-200-C
Continental O-200-D

EASA Type-Certification for the Continental C90-8F, -8FJ, -12F, -12FH, -12FJ, -12FP, 14F, -14FH, -14FJ, -16F, O-200-A, O-200-B, and O-200-C engine models is granted, in accordance with Article 2 paragraph 3(a)(i) of EU Commission Regulation EC 1702/2003, based on the respective EU Member States approvals prior to 28 September 2003.
II. Certification Basis

1. State of Design Authority Certification Basis

See FAA TCDS E-252

2. Reference Date for determining the applicable airworthiness requirements

Same as FAA certification reference date:
O-200-D: 05 November 2007

3. EASA Certification Basis

3.1. Airworthiness Standards

All except O-200-D: CAR 13

O-200-D: CS-E Initial Issue

3.2. Special Conditions (SC)

none

3.3. Equivalent Safety Findings

none

3.4. Deviations

none

3.5. Environmental Protection

none (not required for piston engines)
III. Technical Characteristics

1. Type Design Definition

As defined by CONTINENTAL stocklist.

2. Description

The Continental C90/O-200 engine is a carbureted, horizontally opposed, four cylinder four stroke, spark-ignited, air-cooled, wet sump engine incorporating a bottom induction and exhaust system, and provisions for rear mounted accessories. C90 series engines suffixed by the letter J are equipped with a fuel injector instead of a carburetor.

Displacement: 3.29 dm³ (201 cu. in.)
Bore x stroke: 103.2 mm x 98.4 mm (4.0625 in. x 3.875 in.)
Compression ratio: 7 : 1 (all except O-200-D)
8.5 : 1 (O-200-D)

Gear ratio: N/A

3. Equipment

Magnetos: 2 Bendix-Scintilla S4RN-21 or -1227; or Slick—Electro 443 or 4003 magnetos or 1 each Bendix-Scintilla S4RN-200 and 204 (for C90-8F)
2 Bendix-Scintilla S4LN-21 or -1227 or 1 each S4LN-200 and -204; Slick-Electro 447, 4001 or 4201 magnetos (for C90-12F, -14F, -16F; O-200-A, -B, -C)
Slick Electro 4301 (both sides) or 1 each CONTINENTAL S4LSC-200 and S4LSC204 or 1 each CONTINENTAL S4LSC-200 and S4LSC204T or CONTINENTAL S4LSC-21 (both sides) (for O-200-D)

Spark Plugs: Ref. CONTINENTAL Service Information Letter SIL03-2 or latest FAA approved revision

Alternators: The engine is provided with a gear driven alternator.

<td>74.6 (100) at 2750 RPM</td>
</tr>
</tbody>
</table>

Note: the performance values specified above correspond to minimum values defined under the conditions of ICAO or ARDC standard atmosphere.

7. Control System

The C90/O-200 series engines are equipped with a carburetor and a two magneto ignition system.

8. Fluids (Fuel, Oil, Coolant, Additives)

Fuel: Aviation Gasoline, minimum grade 80/87 (all except O-200-D), minimum grade 100LL, 100/130 (O-200-D)

Oil: see CONTINENTAL Spec MHS No. 24

</tr>
</tbody>
</table>

Notes: - CW - clockwise; CCW – counter clockwise (viewing drive pad)
1) Does not apply to O-200-D engines
2) CONTINENTAL Equipment 5809 incorporating CONTINENTAL P/N 40585 pump approved as part of type design of the O-200-A, -B, -C engines. AC fuel pump, CONTINENTAL P/N 631391, available as optional equipment on C90-16F.
3) C90-16F, and O-200-A, -B, -C engines only

IV. Operating Limitations

1. Temperature Limits

Cylinder head: 274 °C (525 °F) (all except O-200-D)
               249 °C (480 °F) (O-200-D)
Cylinder barrel: 135 °C (275 °F) (C90 series)
                  143 °C (290 °F) (O-200-A, -B, -C)
Oil inlet: 107 °C (225 °F) (C90 series)
            107 °C (225 °F) (O-200-A, -B, -C when using straight mineral oil)
            116 °C (240 °F) (O-200-A, -B, -C when using detergent oil meeting MHS-24, see Note 2)
            116 °C (240 °F) (O-200-D)

2. Speed Limits

Max. overspeed (10 seconds, Momentary overspeed): 3000 rpm
See latest revision of CONTINENTAL Standard Practice Maintenance Manual M-0, Chapter 6, for detailed information
3. Pressure Limits

3.1 Fuel Pressure

Inlet to carburetor,
minimum: +34.5 kPa (+5.0 psig) (MA-3SPA, TCM P/N 627143, 633028, 637101, 637835, 640416)
minimum: +34.5 kPa (+6.0 psig) (all other carburetor air intake assembly / carburetor combinations)
maximum: +41.4 kPa (+6.0 psig)

3.2 Oil Pressure

Normal: 207...414 kPa (30...60 psig)
Idle, minimum 69 kPa (10 psig)

Service Bulletins and Service Letters

As issued
VI. Notes

1. Engine model numbers may include a suffix to define minor specification changes and/or accessory packages. Example O-200-D(10).

2. Detergent oil meeting Continental Specification MHS-24 required when using 116 °C (240 °F) oil inlet limits except during break-in period. Follow manufacturer's instructions for break-in or when changing oil types. Marking or placards prescribing use of Continental Specification MHS-24 oil only shall be installed on or near the oil filler on installations using 116 °C (240 °F) oil inlet temperatures.

3. The C90-8F engine with Bendix-Stromberg NAS-3A1 carburetor, P/N 530726, is eligible only on Piper PA-11 airplanes equipped with Piper mufflers.

4. The O-200-D engine installation is only allowed in aircraft for which a declaration has been provided that fire proof engine attachment points according to CS-E 130(h) of CS-E Initial Issue are not required.

5. Those C90 series models listed in the heading of this data sheet, suffixed by letters H, J, and P, differ from the basic model designation as follows:
   "H" denotes a special SAE No. 1 flange crankshaft and special crankcase for the installation of a hydraulically operated controllable pitch propeller requiring oil supply through the crankshaft.
   "J" denotes incorporation of Model B-46 Ex-Cell-O fuel injector, P/N 530499, or American Bosch Model PGC-4A-95A2, P/N 534505, at a weight increase of 4 lbs. over the corresponding carburettor equipped engine.
   "P" denotes pusher installation incorporating special crankshaft and thrust bearing.
