		Year 1			
		Modul 2 (8:00 h FFS)			
		EVAL	MV	SBT	ISI
Competencies	APK				
	KNO				
	PSD				
	SAW				

Training Topics	Rejected T/O
	Failure of critical engine between V1 & V2 <i>(until AP ON)</i>
	Engine-out approach & goaround
	Go-around, all engines operative <i>(high energy)</i>
	With a critical engine failed, normal landing
	Adverse Weather
	covered by Competency FPA
	Competencies non-technical (CRM)
	covered by Competency APK
	Go around management
	covered by Competency FPM
	ISI Monitoring, cross checking, error management, mismanaged aircraft state
Unstable approach

		EVP		MVP	SBT 1			SBT 2			SBT 3			ISI
		1	2		a	b	c	a	b	c	a	b	c	
1	Flight Path Management, manual (FPM)			X						X				X
2	Flight Path Management, automation (FPA)			X										+
3	Knowledge (KNO)	X	X		+		X	X	X					
4	Application of Procedures (APK)			X	X					+				X
5	Communication (COM)				+	+	+					+	+	
6	Leadership and Teamwork (LTW)				+	+						X	+	
7	Problem Solving & Decision Making (PSD)	X	X				X	X	X	X		+		
8	Situation Awareness (SAW)	X	X					X	X	X				X
9	Workload Management (WLM)						X						X	

Note: "X" indicates the primary, "+" the secondary focus competencies.

DESIGN MANUAL

Pilot Training Manual EBT Module 2 Design Manual

1.2 EVP 2

1.2.1 Scenario

The scenario commences during descent towards destination YYY. PF is initially the PM of EVP 1. As the flight is performed under line operations criteria, CM1 should take the role of PF, if deemed necessary according OM-A (very demanding approach or landing).

No major system malfunctions are present, except when required in order to facilitate the scenario. Due to the actual destination weather, thunderstorms must be circumnavigated, a go-around is not unlikely.

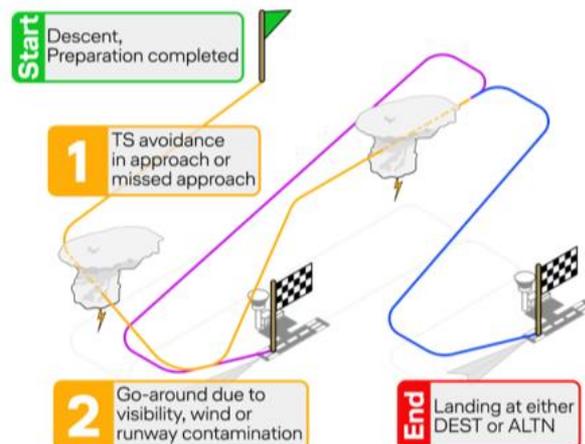

The scenario ends after landing at either destination or alternate.

1.2.2 Training Focus

Competencies	<ul style="list-style-type: none"> • Knowledge (KNO) • Situational Awareness (SAW) • Problem Solving & Decision Making (PSD)
Assessment and Training Topics	<ul style="list-style-type: none"> • Adverse weather (thunderstorm avoidance) • Runway or taxiway condition (contaminated RWY) • Go-around management • Approach, visibility close to minimum
Approach Types	<ul style="list-style-type: none"> • 3D OPS no Autoland (PA)
Aircraft type specific items	-

3.2.3 Details EVP 2

Focus Competencies: SAW, PSD, KNO

Focus Competencies: SAW, PSD, KNO

For short-range flights, EVP 1 may be the continuation of the previous flight (EVP 1) without a reposition. In case of reposition, the Instructor will calculate the remaining fuel from EVP 1.
