

FAQ n.104867**FAQs:**

[Avionics, Supplemental Type Certificates](#)

Question:

How can we identify the ops capability of the installed systems so that the operator can get the OPS SPEC amended with the capability? Identify RNP or PBN Doc.?

Answer:

The AFM(S) proposed by the TC/STC holders should normally contain statements addressing the navigation operational capabilities demonstrated during the airworthiness approval.

FAA AC 20-138D Change 2, Appendix 5, provides some examples.
