European Union Aviation Safety Agency

FAQ n.104875

FAQs:

Certification Processes, Supplemental Type Certificates

Question:

What are the EASA minimum prerequisites for DOAs to process and approve minor design changes?

Answer:

In order to be able to process and approve minor changes to the type design, the design organization must have at least the privileges 21.A.263 (c) 1 (classification) and 21.A.263 (c) 2 (approval of minors) in its TOA. It is fundamental that the aforementioned privileges are associated to the scope areas concerned by the minor changes.
