European Union Aviation Safety Agency

FAQ n.104931

FAQs:

Datalink, Supplemental Type Certificates

Question:

Datalink: 2020 target is real challenge for Operators, what are the possible derogations to this target date?

Answer:

Please note that the Operators do not need to notify EASA of datalink exemption. EASA recommends the Operators to notify their Competent Authorities (from the country of registration). Also, EASA plans to issue an SIB (Safety Information Bulletin) to recommend the Operators to indicate their datalink exemption status in their flight plan.
