

Postponed - Workshop on the use of digital technologies in training

new date in 2021 to be confirmed

Event Type: Workshop

Date:

16 Sep 2020

Description

Date

new date in 2021 to be confirmed

Description

The workshop is dedicated to the use of digital technologies in training with a special emphasis on cabin crew training. EASA aims to share views and experiences with stakeholders on the current 'state of the art' of this developing trend.

The workshop is addressed to operators, competent authorities, training organisations and professional organisations developing digital technology tools for aircrew training.

Exchange of information amongst the participants can help identify how new technologies coming to the market can contribute to safety in aviation across domains.
