

**FAQs:**

[What I need to care about: "At all times", Passenger Health Safety - COVID-19, Passengers](#)

**Question:**

**How long should I wear a medical face mask for?**

**Answer:**

It is recommended to wear a medical face mask for the entire duration of the journey.

Typically, medical face masks should be replaced after 4 hours (unless otherwise advised by the manufacturer), or after a shorter period if they have become wet or soiled. For this reason, please evaluate the duration of your journey and take with yourself a sufficient number of medical face masks for the entire duration of your journey.
