European Union Aviation Safety Agency

FAQ n.116517

FAQs:

I plan to provide services (commercial and other) with drones ‘open’ category , Open category, Drones (UAS), Regulations

Question:

What is meant by the requirement for Operational procedures?

Answer:

The drone operator should develop procedures adapted to the type of operations and to the risks involved. Therefore, **written procedures should not be necessary if the drone operator is also the remote pilot, or employs just one remote pilot. In this case the remote pilot** may use the procedures defined by the manufacturer's manual.

If a drone operator employs more than one remote pilot, the drone operator should:

(a) develop procedures for drone operations in order to coordinate the activities between its employees; and
(b) establish and maintain a list of their personnel and their assigned duties.

Regulatory reference: UAS.OPEN.50 under annex part A 2019/947.
