Description

Date & time

04/11/2021, 09:30 - 13:30 CET (UTC +1)

Description

Digitalisation is impacting the aviation business. It brings efficiency and wider opportunities to manage information. It is also transforming traditional processes based on the exchange of paper documents. The change in format, process and security also come with some challenges and digital transformation still appear fragmented in Europe.

The FS Directorate at EASA will host a workshop that aims at cataloguing and reviewing the ongoing digitalisation issues faced by National Competent Authorities (NCA) and Industry in the fields of Airworthiness, Air Operations, Aircrew and Aerodromes.

We will present the results of the survey run in June 2021 and speakers from the NCAs and from the Industry will share their experiences during their digitalisation journey.

The Q&A at the end of the session will allow the participants to identifying possible common approaches for digital transformation. All questions we won't have time to answer we will do so after the session in writing and post it in this link.

[Put your questions to the panelist.](#)
