European Union Aviation Safety Agency

FAQ n.132529

FAQs:

Lithium batteries (Non-rechargeable), Supplemental Type Certificates

Question:

When a non-rechargeable lithium battery (NRLB) project is classified as major, how is EASA going to establish the level of involvement (LOI) in the certification project?

Answer:

General EASA guidance on Level of Involvement (LOI) applies (ref. CM-21.A/21.B-001 Issue 2). Complexity of the project, Applicant Capabilities and past experience with NRLB installation projects should be taken into account to define the EASA LOI in the project.
