

FAQ n.132531**FAQs:**

[Lithium batteries \(Non-rechargeable\)](#), [Supplemental Type Certificates](#)

Question:

I plan to relocate an equipment powered by a non-rechargeable lithium battery (NRLB) but the pre-mod configuration was designed by another design organization. Under which conditions am I allowed to classify the design change as minor?

Answer:

The evaluation of the original safety assessment issued to justify the installation of the pre-mod configuration is a prerequisite to proceed with a minor classification. When the original safety assessment is not available, the non-rechargeable lithium battery (NRLB) relocation project should be classified as major.
