European Union Aviation Safety Agency

# FAQ n.134930

## FAQs:

Airspace Usage Requirements - PBN (Performance-based navigation), Airspace Usage requirements, Regulations

## Question:

**Can conventional navigation procedures be used after 6 June 2030?**

## Answer:

The PBN IR expressly excludes the use of conventional navigation procedures as from 6 June of 2030, except in the event of PBN contingencies, i.e., situations where, for unexpected reasons beyond the control of ATM/ANS service providers, GNSS or other methods used for performance-based navigation are no longer available.

From 6 June 2030, PBN will be the normal means of navigation, supplemented with navigation supported by CAT II/III landing systems, where necessary.
