European Union Aviation Safety Agency

FAQ n.136175

FAQs:

Training and licensing of maintenance personnel — Restrictive measures Russia, EU restrictive measures against Russia

Question:

The Sukhoi Superjet type certificate (TC) is suspended by EASA. In the EU Member States, there are Part-66 licences containing this type rating. Does the competent authority need to suspend this rating in those maintenance licences?

Answer:

No. It is the maintenance activity that is prohibited by the EU sanctions, but the privilege of the Part-66 licences remains unaffected.
