

FAQs:

[Design certificates and design organisation approvals — Restrictive measures Russia, EU restrictive measures against Russia](#)

Question:

Can a holder of a design organisation approval (DOA) issue design approvals under its privileges, which are to be used on an aircraft operated by a Russian operator?

Answer:

No. Design approvals for an aircraft operated by a Russian operator fall within the scope of the Sanctions Regulations. Therefore, no such approval is allowed to be issued under the DOA privileges.
